Contents

NO 1, 10 JANUARY 1981

LETTERS TO THE EDITOR

Monte Carlo simulation of directed percolation on a square lattice *Deepak Dhar and Mustansir Barma* L1

Uniaxial stress measurement on the 0.97 eV line in irradiated silicon *C P Foy, M C do Carmo, G Davies and E C Lightowlers* L7

Longitudinal magnetostriction of bismuth above the last quantum limit *J P Michenaud, J Heremans, J Boxus and C Haumont* L13

PAPERS

Potential energy calculations of molecular and crystal structures in Fourier space *Hans Bradaczek* 1

Commensurate turn angle effects in single-crystal antiferromagnetic dysprosium *R D Greenough, G N Blackie and S B Palmer* 9

Theory of topologically disordered systems: I. Random cell model *Jan Golka and Günter Mahler* 21

Strain interaction effects on the high-spin–low-spin transition of transition metal compounds *Shuhei Ohnishi and Satoru Sugano* 39

Correlation reduction theory for Ising with spin 1/2 *Hwe Ik Zhang* 57

EPR investigations of the superhyperfine interaction and of the zero-field splittings for cubic and tetragonal Gd^{3+} centres at sixfold coordinated sites in AMF_3 crystals *J Y Buzaré, M Fayet-Bonnel and J C Fayet* 67

Thermoluminescence of Z_1 centre in Sr-doped KCl *V S Kamavisdar and B T Deshmukh* 83

Surface Physics

Spin polarised ultra-thin metallic films *J Noffke and L Fritsche* 89

NO 2, 20 JANUARY 1981

LETTERS TO THE EDITOR

Infinitely many phases in a large class of Ising models *Walter Selke* L17

Detection of tunnelling systems in Li_3N by excess specific heat *E Gmelin and K Guckelsberger* L21

The electron Fermi energy of bismuth at high temperatures *I F I Mikhail and O P Hansen* L27

On phase diagram of granular superconductor *Yu E Lozovik and S G Akopov* L31

Birefringence measurements on $KTaO_3$:Li *Eric Courtens* L37

Anomalous scattering of x-rays by total reflection in the L-edge regions of iron and copper *L Kaihola and J Bremer* L43

PAPERS

Hydrodynamics of ^{3}He-A in high magnetic fields *H Brand and H Pleiner* 97

The localisation of electrons in a dense fluid in one dimension *D J Whitelaw and I L McLaughlin* 105

Hole transport in vapour-deposited As_2S_3 *M Burman, J Hirsch and T Ramdeen* 117

An investigation of solid solutions of hydrogen in thulium at low temperature and of their behaviour under electron irradiation *J N Daou, P Vajda, A Lucasson and P Lucasson* 129

The spin S Ising model with a transverse field *J Oitmaa and G J Coombs* 143

Magnetic ordering in praseodymium at millikelvin temperatures *K A McEwen and W G Stirling* 157

Surface Physics

Angle-resolved photoemission from As-stable GaAs (001) surfaces prepared by MBE *P K Larsen, J H Neave and B A Jøyce* 167

NO 3, 30 JANUARY 1981

LETTERS TO THE EDITOR

Synchotron x-ray study of monolayer krypton melting *R J Birgeneau, G S Brown, P M Horn, D E Moncton and P W Stephens* L49
The 2 × 1 reconstruction of the Ge {001} surface *J C Fernandez, W S Yang, H D Shih, F Jona, D W Jepsen and P M Marcus* L55
The predominance of a surface plane of high work function on Ti films *K Kandasamy and N A Surplice* L61

PAPERS

The theory of superlattice critical scattering *Alastair D Bruce* 193
A new approach to electronic transitions in the samarium monochalcogenides *Ramesh Narayan and S Ramaseshan* 211
Analytic solution by the recursion method of the Anderson model for strong disorder *Roger Haydock* 229
Conductivity of the disordered linear chain *D J Thouless and S Kirkpatrick* 235
Kinetic exchange at low charge transfer energies *M V Eremin and Yu V Rakitin* 247
Phase transitions in a spin-1 system with the three-atom interaction *J Aksamit and B Westwanski* 255
Phonon replicas in mixed crystals *D Schmeltzer and R Beserman* 273
Infrared and Raman spectra of ReO_4^- isolated in alkali halides *M R Mohammad and W F Sherman* 283
High-resolution luminescence-excitation spectra of the GR defect in diamond *A T Collins* 289

Surface Physics

Properties of polycrystalline silicon prepared by chemical transport in hydrogen plasma at temperatures between 80 and 400°C *S Veprek, Z Iqbal, H R Oswald and A P Webb* 295
Determination of the hydrogen content of a-Si films by infrared spectroscopy and 25 MeV α-particle elastic scattering *P John, I M Odeh, M J K Thomas, M J Tricker, J I B Wilson, J B A England and D Newton* 309
Corrigenda 319

NO 4, 10 FEBRUARY 1981

LETTERS TO THE EDITOR

Possible layered structure in liquid CH_4–N_2 mixtures *Mark Falk and Ronald Stoner* L65
Electron–phonon interaction and composition-dependent phonon anomaly in CeH_x *Atsushi Fujimori and Nobuo Tsuda* L69
The gaps of the ideal TiS_2 and $TiSe_2$ *H Isomäki and J von Boehm* L75
Spin glass dynamics in the spherical model *Prabodh Shukla and Surjit Singh* L81
Conjecture on the critical frontier of the fully anisotropic homogeneous quenched bond-mixed Potts ferromagnet in square lattice *Constantino Tsallis* L85
Evidence for the presence of mixed valency in $CeNi_2$; XPS study *B D Padalia, Varsha Prabhawalkar, P D Prabhawalkar, E V Sampathkumaran, L C Gupta and R Vijayaraghavan* L93

PAPERS

Statistics of the percolation threshold *Frank G Karioris and Kenneth S Mendelson* 321
Studies of effects of trivalent impurity ions on the transition to the superionic state of fluorites *C R A Catlow, J D Comins, F A Germano, R T Harley, W Hayes and I B Owen* 329
An apparent radiation induced F-centre diffusion process in NaCl at and above room temperature *E R Hodgson, A Delgado and J L Alvarez Rivas* 337
Self-consistent calculation of Compton profiles, x-ray structure factors, and band structure for silicon *R Heaton and E Lafon* 347

Electron density studies of Ti_2O_3 and V_2O_3: experiment and theory *J Ashkenazi, M G Vincent, K Yvon and J M Honig* 353
A simple tight-binding model for deep impurity levels: application to the Jahn–Teller-distorted nitrogen donor in silicon *J A Vergés* 365
The non-compact group O(2, 1) and the Jahn–Teller effect *B R Judd* 375
Absence of spin glass order in the 2D site-diluted triangular antiferromagnet *J A Blackman, G Kemeny and J P Straley* 385
Pure and diluted anisotropic quantum Heisenberg model *R B Stinchcombe* 397
Quasiparticle model of deviations in the spin-flop phase of a one-dimensional spin ½ Heisenberg antiferromagnet *H Aghahosseini and J B Parkinson* 425
EPR study of aggregation of Mn^{2+}–Na^+ vacancy dipoles and precipitation of Mn^{2+} in single crystals of orthorhombic $NaNO_2$ *Akhilesh Kumar Jain and G C Upreti* 439
Nuclear spin relaxation by translational diffusion in liquids and solids: high- and low-frequency limits *C A Sholl* 447
Nuclear spin–lattice relaxation in incommensurate systems *S Žumer and R Blinc* 465
Optically detected magnetic resonance of P_4 cluster centres in phosphorus-doped zinc selenide *D Verity, J J Davies and J E Nicholls* 485
$KFeF_3$ single crystal by polarised Mössbauer ray *D Barb, D Tarină, A Ito and S Morimoto* 497
Far-infrared absorption of silver β-alumina *W Hayes, L Holden and B C Tofield* 511
Donor–acceptor transition in $CuGaSe_2$ *A Poure, J P Leyris and J P Aicardi* 521
L_{III} x-ray absorption discontinuity of Nd, Sm, Gd, Dy and Yb in their sesquioxides *Pranawa Deshmukh, Prabodhachandra Deshmukh and Chintamani Mande* 531

Surface Physics

Surface relaxation effects on the electronic structure of (111) and $(\bar{1}\bar{1}\bar{1})$ surfaces of GaP, GaAs, and GaSb *Masahiko Nishida* 535
Hall measurements on MOSFET devices prepared by TCE oxidation *D Kohl, C Becker, G Heiland, U Niggerbrugge and P Balk* 553
Corrigenda 559

NO 5, 20 FEBRUARY 1981

LETTERS TO THE EDITOR

Exact critical condition for a site-diluted Potts model *I Kondor and T Temesvári* L97
Relation between the Kraut–Kennedy melting law and the Simon fusion equation at high pressures *Do Yi-Jing* L103
ENDOR determination of covalency in K_2NaAlF_6:Fe^{3+}, Cr^{3+} *C D Adam* L105
Corrigenda L111

PAPERS

Atomic dynamics and momentum transfer in dense liquids *T Gaskell and P E Mason* 561
Dynamical coupling in simple molten salts *F Yoshida* 573
Calculation of the frequency distribution function of solids using the 'unfolding technique' *Usha Malik and L S Kothari* 581
Phonon linewidths in $Nb_{1-c}Mo_c$ alloys *Gunter Grunewald* 595
Commensurate–incommensurate transition: on the coupling between phase solitons and strain *H-J Brocksch, H U Everts and H Muller-Krumbhaar* 603
Differential scanning calorimetric and Mössbauer studies of phase transitions in $[N(CH_3)_4]_2FeCl_4$ *M D Sastry, U R K Rao, K H Madraswala and B D Joshi* 615
A non-perturbative approach to the bound polaron III *Sukla Mukhopadhyay and T K Mitra* 623
Exchange and correlation potentials for finite temperature quantum calculations at intermediate degeneracies *M W C Dharma-wardana and Roger Taylor* 629
Optical lineshapes and electronic eigenstates of substitutional defects and vacancies *R E Pena and D C Mattis* 647

Numerical investigation of the (s + p) ⊗ T_{1u} system: I. Vibronic eigenstates and absorption spectra *Ulrich Grevsmuhl* 665
Numerical investigation of the (s + p) ⊗ T_{1u} system: II. Reduction factors and emission spectra *Ulrich Grevsmuhl* 685
Acoustic relaxation due to Ni^{3+} ions in Al_2O_3 *A Bankovskis, P J King and D J Monk* 697
Correlation between frustrated plaquettes in the random bond square lattice *R Liebmann and H G Schuster* 709
Real-space renormalisation-group study of the one-dimensional Hubbard model *C Dasgupta and P Pfeuty* 717
A model for unusual magnetic anisotropy of Ce pnictides *Katsuhiko Takegahara, Hiroko Takahashi, Akira Yanase and Tadao Kasuya* 737
Energy transfer via disturbed host species in a mixed organic crystal system *O Pekcan* 745
Excitations in commensurate and incommensurate $BaMnF_4$: a light scattering study *D J Lockwood, A F Murray and N L Rowell* 753
A new procedure for analysing complex thermoluminescence *M A S Sweet and D Urquhart* 773
X-ray Compton profile of lithium in low momentum transfer region *T Suzuki and H Nagasawa* 783

Surface Physics

Gauss–Seidel–Aitken perturbation expansions for interlayer multipole scattering in LEED: bootstrap acceleration method *David L Adams* 789

NO 6, 28 FEBRUARY 1981

LETTERS TO THE EDITOR

Energy and particle number self-diffusion of a classical particle in the potential of randomly fixed scatterers *M Lücke* L113
The thermodynamics of characteristic defect parameters *C R A Catlow, J Corish, P W M Jacobs and A B Lidiard* L121
Finite size scaling approach to Anderson localisation *J L Pichard and G Sarma* L127
Renormalisation group study of Anderson localisation in two dimensions: effect of second-order terms *K Hillebrand and R M Nieminen* L133
New EPR data for chromium in electron-irradiated p-type GaAs: the observation of Cr complexes *J E Whitehouse, N K Goswami and R C Newman* L139
Corrigendum L145

PAPERS

Coupling coefficients for the marcasite structure *H Kunert and M Zimpel* 801
Physical properties and phenomenological theory around the successive high-temperature phase transitions of $(C_2H_5NH_3)_2CuCl_4$ *M J Tello, J L Mañes, J Fernandez, M A Arriandiaga and J M Perez-Mato* 805
A Raman study of the phase transition in hexa-ammine nickel (II) chloride *T E Jenkins and A R Bates* 817
Random glass structure and electron localisation in amorphous V_2O_5 *M Henri, C Sanchez, C R'Kha and J Livage* 829
Dielectric anomalies in extremely non-parabolic zero-gap semiconductors *G Bastard* 839
Interchain coupling in linear conductors *A M Finkel'stein and S A Brazovsky* 847
On the theory of hopping conductivity in disordered systems *B Movaghar and W Schirmacher* 859
Diffusion of electrons and holes in semiconductors under conditions of gradients of lattice temperature and carrier concentration *M Wautelet* 891
Electron transport in direct-gap III–V ternary alloys *D Chattopadhyay, S K Sutradhar and B R Nag* 891
Non-universal critical behaviour of random resistor networks with a singular distribution of conductances *Avraham Ben-Mizrahi and David J Bergman* 909
Computation of spin Hamiltonian parameters for $3d^n$ ions at arbitrary symmetry within the lowest *LS* term approximation *Czeslaw Rudowicz* 923

A new method of analysing critical behaviour of high-temperature series in a finite field *K J Chang and K C Lee* 935
Raman scattering from magnons and phonons in the mixed antiferromagnet $Fe_{1-x}Mn_xCl_2$ *G Mischler, D Bertrand, D J Lockwood, M G Cottam and S Legrand* 945
The optically detected resonance of pure and doped silver bromide *Alfred Marchetti* 961
Frequency splitting and saturation of the field-induced Raman spectrum of the ferroelectric soft mode in $SrTiO_3$ *T Shigenari and H Ebashi* 969

Surface Physics

Tunnelling in metal–silicon Schottky barriers and effects of radiation compensation *J T Wimmers and J E Christopher* 977

NO 7, 10 MARCH 1981

LETTERS TO THE EDITOR

Spin alignment of protons in NH_4^+ at low temperatures *H Friedrich, K Guckelsberger, R Scherm and A Hüller* L147
On the equivalence of two models of charged hard spheres in a uniform background *Jean-Pierre Hansen* L151
Phenomenological theory of the squashing mode in the BW phase of superfluid ^{3}He *M S Wartak* L155
Itinerant magnetism in hybridised degenerate electronic bands *J Spalek and D K Ray* L159

PAPERS

Radiogenic Sn defects in ion implanted InP *S Damgaard, J W Petersen and G Weyer* 993
The temperature dependence of methyl tunnelling motion in three acetates *S Clough, A Heidemann and M Paley* 1001
A kinetic theory of the temperature dependence of methyl tunnelling spectra *S Clough* 1009
Pressure dependence of phonon energies in d_8-naphthalene *U Schmelzer, E L Bokhenhov, B Dorner, J Kalus, G A Mackenzie, I Natkaniec, G S Pawley and E F Sheka* 1025
Structural studies of deuterated CsH_2AsO_4 in its paraelectric and ferroelectric phases *W J Hay and R J Nelmes* 1043
Electron energy band shapes from angular dependent electron energy loss spectroscopy *R D Bringans* 1053
Energy bands of the cadmium halides from electron energy loss spectroscopy *R D Bringans and W Y Liang* 1065
Deep impurities in semiconductors: II. The optical cross section *J C Inkson* 1093
Diffusion size effect calculation for n-Si *J E Aubrey* 1103
Non-covariant corrections to magnetic solitons in $CsNiF_3$ *Peter S Riseborough, D L Mills and S E Trullinger* 1109

NO 8, 20 MARCH 1981

LETTERS TO THE EDITOR

The dynamic response of a non-uniform distribution of electrons *M W C Dharma-wardana* L167
Computer simulation of crack propagation: lattice trapping *A Paskin, Dilip K Som and G J Dienes* L171
Diffusion and logarithmic corrections to the conductivity of a disordered non-interacting 2D electron gas: power law localisation *M Kaveh and N F Mott* L177
Electron correlations and logarithmic singularities in density of states and conductivity of disordered two-dimensional systems *M Kaveh and N F Mott* L183

The influence of adsorbed layers in controlling Schottky barriers *V Montgomery, R H Williams and G P Srivastava* L191
Pressure dependence of the incommensurate magnetic phase of $NiBr_2$ and $Ni_{0.92}Zn_{0.08}Br_2$ *P Day and C Vettier* L195
The role of the Jahn–Teller effect in chromium-doped GaAs *A S Abhvani, S P Austen, C A Bates, J R Fletcher, P J King and L W Parker* L199

PAPERS

Structural phase transitions in crystals with $P6_3/mmc$ symmetry *J M Pérez-Mato, J L Mañes, M J Tello and F J Zúñiga* 1121
The activation energy for clustering of Ca^{2+}–vacancy pairs in NaCl and a comparison with the diffusion activation energy *J S Cook and J S Dryden* 1133
A generalised Friedel sum rule *J B Pendry* 1137
Localisation and localisation edges—a precise characterisation *Robert Johnston* 1145
The dielectric function of Bi based on a two-band model *Preben Alstrøm and Hans Nielsen* 1153
Thermomagnetic study of the antiferromagnetic solid solutions pMnO–qCoO *J Kleinclauss, R Mainard, H Fousse, N Ciret, D Bour and A J Pointon* 1163
Incidence of ferroelectric phase transitions on the electronic structure of potassium niobate *F M Michel-Calendini and H Chermette* 1179
The Raman spectrum and analysis of phonon modes in sodalite *J Ariai and S R P Smith* 1193

Surface Physics

Inelastic scattering of fast electrons by spherical surfaces *M Schmeits* 1203

NO 9, 30 MARCH 1981

LETTERS TO THE EDITOR

Quasi-elastic light scattering at the order–disorder phase transition in ammonium chloride *S R Andrews and R T Harley* L207
The cellular method for graphite *C P Mallett* L213
Localisation in disordered three-dimensional systems *C M Soukoulis and E N Economou* L221
Quantum δ-dimensional Landauer formula *M Ya Azbel* L225
Possible experimental approach to strong localisation *M Ya Azbel* L231
A new and unique Eu-based mixed valence system: $EuPd_2Si_2$ *E V Sampathkumaran, L C Gupta, R Vijayaraghavan, K V Gopalakrishnan, R G Pillay and H G Devare* L237
Atomic effects in the photoemission cross sections of the valence states of MoS_2 *I T McGovern, K D Childs, H M Clearfield and R H Williams* L243

PAPERS

The phonon frequency distribution of the three modifications of NaCN *N Nücker, J Daubert, H Jex, M Müllner and J-B Suck* 1217
The velocity spectrum of rotons emitted by negative ions in superfluid ^{4}He *R M Bowley* 1225
Phase-transition-like behaviour in the problems of different types of polaron *Hishashi Shoji and Naoki Tokuda* 1231
Defect states dominated by localised potentials in semiconductors *S Brand, M Jaros and C O Rodriguez* 1243
A model for the interpretation of measurements of photoionisation and capture cross sections associated with deep-level impurities *B K Ridley and M A Amato* 1255
The importance of static strains in studies of thermal phonon scattering by strongly coupled impurities *J L Patel, J K Wigmore and J R Fletcher* 1271
The theory of coupled Cr^{3+} pairs of D_{3h} symmetry *K R Barry, K J Maxwell, K A Siddiqui and K W H Stevens* 1281
Pair spectra studies of Cr^{3+} ions in the ($^4A_2 \times {}^2T_1$) excited states of $Cs_3Cr_2Cl_9$ *I W Johnstone, K J Maxwell and K W H Stevens* 1297

Metastable states in spin glasses with short-ranged interactions *A J Bray and M A Moore* 1313
Optically detected nuclear magnetic resonance studies of $LiYF_4:Pr^{3+}$ in the ground electronic state $^3H_4$ *K K Sharma and L E Erickson* 1329
Optically detected magnetic resonance of two shallow acceptor centres in cadmium sulphide *J L Patel, J E Nicholls and J J Davies* 1339

Surface Physics

Enhanced light scattering by adsorbates—effects of surface plasmon dispersion relation *M Babiker* 1351
Photoluminescence studies of band-benching in hydrogenated amorphous silicon thin films *D J Dunstan* 1363
Field emission from tungsten (110) *A Modinos and G Oxinos* 1373
Theory of inverse photoemission *J B Pendry* 1381

NO 10, 10 APRIL 1981

LETTERS TO THE EDITOR

A simple interpretation of the absence of quantum diffusion for one- and two-dimensional disorder *C H Hodges* L247
Bound exciton recombination in beryllium-doped silicon *M O Henry, E C Lightowlers, M Killoran, D J Dunstan and B C Cavenett* L255
Dilute quantum transverse Ising model *R B Stinchcombe* L263
The random field Ising model in one and two dimensions *K De'Bell* L269
Experimental investigation of the spin packet width near a cross-relaxation resonance *R Boscaino, C Cusumano and F M Gelardi* L275
Superradiance of excitons *Y C Lee and K C Liu* L281

PAPERS

Renormalisation group treatment of bond percolation in anisotropic and 'inhomogeneous' planar lattices *Aglaé C N de Magalhães, Constantino Tsallis and Georges Schwachheim* 1393
Theory of diffraction pattern of silver-chalcogenide-type superionic conductors *Yoshimi Tsuchiya* 1409
Comments on the phonon spectra of covalent semiconductors *P E Van Camp, V E Van Doren and J T Devreese* 1421
Electronic states in non-stoichiometric rare-earth hydrides *Atsushi Fujimori and Nobuo Tsuda* 1427
On the spectrum of spatially disordered systems *P V Elyutin* 1435
Theory of topologically disordered systems: II. Impurity bands in a donor-pair approximation *Jan Golka and Günter Mahler* 1445
Charge density waves in a strong magnetic field *B G S Doman* 1457
Exact solution of the s–d exchange model (Kondo problem) *P B Weigmann* 1463
Nuclear spin relaxation by translation diffusion in solids: VI. Monovacancy limit *C A Sholl* 1479
Nuclear quadrupole interaction of ^{111}Cd and inter-configuration fluctuation in $EuCu_2Si_2$ *S H Devare, H G Devare and J A Cameron* 1491
Raman spectrum and cation chain dynamics in a layered crystal: $(NH_3–CH_2–CH_2–NH_3)CdCl_4$ *Z Iqbal, H Arend and P Wachter* 1497
Electron capture luminescence in GaP:O revisited *M Gal, B C Cavenett and P J Dean* 1507

Surface Physics

Piezoelectric scattering in quantised surface layers in semiconductors *P K Basu and B R Nag* 1519
The extended x-ray absorption fine structure in the reflectivity at the K edge of Cu *G Martens and P Rabe* 1523
Corrigenda 1535

NO 11, 20 APRIL 1981

LETTERS TO THE EDITOR

Diffuse Umklapp scattering in amorphous metals *J Hafner* L287

Complex configurations in cooperative Jahn–Teller effect *Pavel Novák* L293

Thermal expansion of $KTaO_3$ at low temperatures *G K White* L297

Essential singularities and Wegner's inequality $\gamma \leq 1$ for the averaged Green function of an electron in a random potential *Reli Rosman* L301

Temperature variation of the thermopower of a graphite–$FeCl_3$ intercalation compound *J-P Issi, J Boxus, B Poulaert, H Mazurek and M S Dresselhaus* L307

Spatially separated electron–hole system in high magnetic fields *I V Lerner, Yu E Lozovik and D R Musin* L311

Surface tension of the dilute Ising model at $T = 0$ *Mario J de Oliveira* L317

Strong itinerant magnetism in ternary boride $CeRh_3B_2$ *S K Dhar, S K Malik and R Vijayaraghavan* L321

On solitons in semiclassical limit of the quantum spin-$\frac{1}{2}$ Heisenberg chain *A Popielewicz* L325

Ligand displacement contributions to hyperfine interactions *H S Murrieta, G S Aguilar and J O Rubio* L331

Non-linear excitations in a compressible chain of dipoles *M Remoissenet* L335

Calculations of spectral transfer in disordered and low-dimensional systems *M C K Wiltshire* L339

Radiation-induced interstitial boron defects in gallium phosphide and gallium arsenide *J Woodhead and R C Newman* L345

Conduction band symmetry in Ta chalcogenides from Ta L-edge x-ray absorption spectroscopy (XAS) *J V Acrivos, S S P Parkin, J Code, J Reynolds, K Hathaway, H Kurasaki and E A Marseglia* L349

PAPERS

The crystal structure of phase I of bicyclo (2.2.2) octane at 265 K *J L Sauvajol and J P Amoureux* 1537

A powder neutron diffraction study of stoichiometric silver beta alumina at 4.2 K *J M Newsam and B C Tofield* 1545

The neutron scattering function $S(Q, \omega)$ from adamantane *C G Windsor, J C Damien, J Lefebvre and R M Richardson* 1555

Pressure dependences of the elastic constants of PbTe, SnTe and $Ge_{0.08}Sn_{0.92}Te$ *A J Miller, G A Saunders and Y K Yoğurtçu* 1569

The corundum structure: internal strain tensors and cluster configurations under stress *C S G Cousins* 1585

The influence of a secondary order parameter on the incommensurate–commensurate transition *T Nattermann and S Trimper* 1603

Structural phase transitions in K_2CO_3 *Angela Maciel, J F Ryan and P J Walker* 1611

Energy and hydrodynamics of superfluid ^3He *R Combescot* 1619

Theory of ferromagnetic cavity polaritons *Avishay Yaniv* 1633

Magnetoresistance measurements in n-type CdS single crystals annealed in molten Cd and In *B R Sethi, O P Sharma, P K Goyal and P C Mathur* 1649

A computer simulation of the dilute Ising ferromagnet *T Takahashi and M Shimizu* 1657

Percolation with long-range interactions *Michael J Stephen and Amnon Aharony* 1665

The antiferromagnetic structure of $DyMn_2O_5$ at 4.2 K *C Wilkinson, F Sinclair, P Gardner, J B Forsyth and B M R Wanklyn* 1671

Surface Physics

Effect of impurities on the two-dimensional electron gas polarisability *J S Nkoma* 1685

Intermediate-coupling approach in the induced covalent bond theory of chemisorption *Shinichi Sawada* 1693

NO 12, 30 APRIL 1981

LETTERS TO THE EDITOR

Theory of the self-trapped exciton bubble in rare gas solids *K S Song and C H Leung* L359

Low-temperature specific heat of neutron-irradiated crystalline quartz *M Saint-Paul and J C Lasjaunias* L365

Random-temperature Ginzburg–Landau model: relation to conventional spin glass models *D Sherrington* L371

Optical transitions to the first vibronic state of GR1 in diamond *J E Lowther* L375

The stages of nitrogen aggregation in diamond *T Evans, Z Qi and J Maguire* L379

PAPERS

High resolution studies of cubic perovskites by elastic neutron diffraction II: $SrTiO_3$, $KMnF_3$, $RbCaF_3$ and $CsPbCl_3$ *J Hutton and R J Nelmes* 1713

The thermal conductivity and specific heat of epoxy-resin from 0.1–80 K *S Kelham and H M Rosenberg* 1737

Dielectric tensor and plasmon–phonon modes in semiconductors with anisotropic conduction valleys *S Goettig* 1751

The ground state of an impure FCC Ising antiferromagnet *B G S Doman* 1765

Correlation reduction theory for Ising model: II. Generalisation to arbitrary spin *Hwe Ik Zhang and Byung Il Min* 1769

Correlation reduction theory for Ising model: III. Application to anisotropic lattices *Byung Il Min and Hwe Ik Zhang* 1779

Néel temperatures of dilute $Fe_{1-x}Cd_xCl_2$ and mixed $Fe_{1-x}Mn_xCl_2$ by susceptibility measurements *D Bertrand, A R Fert, S Legrand, J P Redoulès and M C Schmidt* 1789

Surface Physics

Changes in the surface energy of solids caused by light absorption *L L Konstantinov, V P Hinkov and J I Burov* 1799

NO 13, 10 MAY 1981

LETTERS TO THE EDITOR

A theory of surface instabilities produced by the crystal size effect *P Masri* L385

Stress-induced dichroism and Jahn–Teller active modes at the neutral vacancy in diamond *Gordon Davies* L391

Magnetic delocalisation of a two-dimensional electron gas and the quantum law of electron–electron scattering *M J Uren, R A Davies, M Kaveh and M Pepper* L395

On the ferromagnetic phase breakdown of a two-dimensional Ising model with competing interactions *J R L de Almeida, I P Fittipaldi and F C Sá Barreto* L403

Fundamental reflectivity spectra of CdMnTe mixed crystals *T Kendelewicz* L407

PAPERS

Use of symmetry in non-muffin-tin multiple scattering theory *V C Rakhecha and N S Satya Murthy* 1809

Transport properties of CeSb *M Escorne, A Mauger, D Ravot and J C Achard* 1821

Spin glasses with various ranges of interaction at low temperatures *Y Proykova and N Rivier* 1839

Neutron diffraction study of long-range antiferromagnetic order and crystal structure of uranium (III) tri-iodide *A Murasik, P Fischer and W Szczepaniak* 1847

The no-phonon luminescence at 0.84 eV in GaAs:Cr—the Zeeman splitting *F Voillot, J Barrau, M Brousseau and J C Brabant* 1855

Free exciton emission in forward biased ZnSe MIS diodes *X W Fan and J Woods* 1863

Thermoluminescence in LiF (TLD-100) and LiF crystals irradiated at room temperature *F Sagastibelza and J L Alvarez Rivas* 1873

Surface Physics

The Auger and autoionisation spectra of clean and oxidised samarium and erbium *F P Netzer, E Bertel and J A D Matthew* 1891
Corrigenda 1903

NO 14, 20 MAY 1981

LETTERS TO THE EDITOR

Localisation in disordered two-dimensional systems and the universal dependence on diffusion length *M Kaveh, M J Uren, R A Davies and M Pepper* L413
Variable-range hopping including correlation between energies and positions *M Ortuno* L421

PAPERS

Derivative coupling and ordering in a system of coupled linear chains *I Batistić, G Theodorou and S Barišić* 1905
Two-dimensional jump singularities from critical filaments in three-dimensional spectral problems *A A Bahurmuz and P D Loly* 1911
Critical and tricritical points near the Potts model transition of uniaxially stressed SrTiO$_3$ *Daniel Blankschtein and Amnon Aharony* 1919
Neutron scattering study of cooperative Jahn–Teller effects in TmAsO$_4$ *P J Becker, G A Gehring, R Ghosh and M Steiner* 1945
Pseudo Jahn–Teller effect for a doublet: effect of a tetragonal field on the cubic $E \otimes \varepsilon$ system *L F Feiner* 1955
Neutron scattering investigation of the mixed magnetic system Fe$_{1-x}$Mn$_x$Cl$_2$ *D Bertrand, D Petitgrand, B Hennion and S Legrand* 1975
A study of the magnetic exchange interactions in SrEu$_2$Fe$_2$O$_7$ by ^{151}Eu Mössbauer spectroscopy *T C Gibb* 1985
The diffusive flow of high-frequency thermal waves in dielectrics *I F I Mikhail* 1997
The influence of an electric field and hydrostatic pressure on dielectric properties and phase transitions in PbZrO$_3$ *J Hańderek, M Pisarski and Z Ujma* 2007
Determination of Landau free-energy parameters by dielectric measurements in the ferroelectric TSCC *J Bornarel and V H Schmidt* 2017
Effects of pressure on the spectra and lifetimes of Nd$_x$Y$_{1-x}$P$_5$O$_{14}$ and ruby *Larry D Merkle, Ian L Spain and Richard C Powell* 2027

Surface Physics

Sodium ion migration in glass on electron beam irradiation *D M Usher* 2039

NO 15, 30 MAY 1981

LETTERS TO THE EDITOR

Role of non-topological solitons in statistical mechanics of 1D complex scalar fields with phase anisotropy *S Ohta and K Nakamura* L427
Determination of potential surfaces from multiphonon transition rates *T Markvart* L435
A quasi-Kondo effect in Pb$_{1-x}$Ge$_x$Te alloys *H Yaraneri, A D C Grassie, He Yusheng and J W Loram* L441
Three new superconducting members of the family of tetramethyltetraselenafulvalene (TMTSF) salts *S S P Parkin, M Ribault, D Jerome and K Bechgaard* L445
XPS and x-ray absorption edge studies of the surface and bulk valence states of cerium in CeCo$_2$ *C N R Rao, D D Sarma, P R Sarode, R Vijayaraghavan, S K Dhar and S K Malik* L453

REVIEW ARTICLE

Spin-polarised low-energy electron diffusion *Roland Feder* 2049

PAPERS

Strong-coupling corrections to the shear viscosity of superfluid ^{3}He-B *Y A Ono and J Hara* 2093

The nature of dangling bonds at line defects in covalent semiconductors *M J Kirton and M Jaros* 2099

Optical response function from impurity centres with degenerate and nearly degenerate states *S N Evangelou* 2117

Studies of deep chromium acceptor levels in InP *S Fung and R J Nicholas* 2135

Magnetic dipole scattering of phonons and the thermal conductivity of $GdCl_3$ *G S Dixon* 2147

Surface Physics

Electronic structure ot buckled and vacancy models of Si(111)–7 × 7 surface by DV–Xα cluster method *K Nakamura, T Hoshino, M Tsukada, S Ohnishi and S Sugano* 2165

The lifetimes of excited states and spectral intensities of DCEL in ZnS:Cu:Nd:Cl thin films *G Z Zhong and F J Bryant* 2175

A theoretical study of angle-resolved photoemission from adsorbates: bromine on (100) face of copper *Nikhiles Kar* 2185

NO 16, 10 JUNE 1981

Finite-size scaling approach to Anderson localisation: II. Quantitative analysis and new results
J L Pichard and G Sarma L617
Further remarks on metastability in amorphous semiconductors *D C Licciardello* L627
Monte Carlo studies of $\pm J$ spin glasses with continuous symmetries in $D = 2$
C Kawabata, J V José and S Kirkpatrick L633

PAPERS

Relaxations and their strain derivatives around impurity ions in MgO *M J L Sangster* 2889
Direct calculation of force constant changes around impurities in crystals
M J L Sangster, D K Rowell and A S Ashman 2899
Calculations of intrinsic defect energies in the alkali halides *D K Rowell and M J L Sangster* 2909

Low-temperature phonon dynamics of a classical compressible Heisenberg chain *J Fivez, B De Raedt and H De Raedt* 2923
Valence band averages in silicon: Anisotropy and parabolicity *R G Humphreys* 2935
The effect of electron–electron interactions on the Peierls transition in metals with strong nesting of Fermi surfaces *P B Littlewood and Volker Heine* 2943
Theory of transmission coefficients and resonance Brillouin scattering for three-branch exciton–polaritons *G Palamidas and D R Tilley* 2951
Auger linewidths for core levels in light elements embedded in metals *F Guinea and F Flores* 2965
A theory for many-electron hopping rates *M Pollak* 2977
Effect of electron irradiation on the non-linear properties of $NbSe_3$ *P Monceau, J Richard and R Lagnier* 2995
Effects of the propagation of ultrasound on linear longitudinal conductivity in degenerate semiconductors *Chhi-Chong Wu and Jensan Tsai* 3005
Metastable states and innocent replica theory in an Ising spin glass *Stephen A Roberts* 3015
On the long-range random Heisenberg ferromagnet *Sergio S Makler, Mucio A Continentino and Enrique V Anda* 3027
A numerical study of the RPA spin waves of the Mattis–Heisenberg model *Robert Johnston* 3033
The influence of the anisotropy on the temperature renormalisation of the magnetic excitations in $FeCl_2$ *M G Pini, E Rastelli, A Tassi and V Tognetti* 3041
Analysis of Raman lineshapes and local order in squaric acid *Erling Fjaer, Jorunn Grip and Emil J Samuelsen* 3057

Surface Physics

Slowly varying time-dependent local perturbations in metals: a new approach *R Brako and D M Newns* 3065
High temperature optical modes of vibration in LiF thin films *K Hisano* 3079
On the temperature dependence in photoemission from metal surfaces *C G Larsson and J B Pendry* 3089
Surface states on W {001} (1 × 1) and $(\sqrt{2} \times \sqrt{2})R45°$ phases: angle-resolved photoemission *J C Campuzano, J E Inglesfield, D A King and C Somerton* 3099
Frequency-dependent photoemission from aluminium *N Barberan and J E Inglesfield* 3115

NO 22, 10 AUGUST 1981

LETTERS TO THE EDITOR

The acoustic polaron via the deformation potential under the influence of a Coulombic impurity and its phase diagram *N Tokuda, J Shoji and K Yoneya* L637
Interfacial colloidal crystals and melting transition *R K Kalia and P Vashishta* L643
Dynamic scaling near the ferromagnetic phase transition of YIG *L A Dissado and R M Hill* L649
A contribution to the second-order perturbation theory of the one-electron properties of liquid metals *K Niizeki* L655
The conductivity of disordered systems and the scaling theory *N F Mott and M Kaveh* L659
The paramagnetic state of BCC iron *B Sriram Shastry, D M Edwards and A P Young* L665
Continuous time random walk along inequivalent states *M Chaturvedi and V Srivastava* L671

PAPERS

The structure of molten zinc chloride *S Biggin and J E Enderby* 3129
The long-wavelength behaviour of the structure factor of liquid alkali metals *R Evans and T J Sluckin* 3137
The low-temperature behaviour of annealed, quenched or irradiated solid solutions of hydrogen in erbium *J N Daou, P Vajda, A Lucasson and P Lucasson* 3155
Calorimetric study of the ferroelectric $(N(CH_3)_4)_2ZnCl_4$: critical behaviour of the commensurate–incommensurate phase transition *I Ruiz Larrea, A López-Echarri and M J Tello* 3171
Neutron study of the incommensurate phase in $(N(CD_3)_4)_2ZnCl_4$ crystal *G Marion, R Almairac, J Lefebvre and M Ribet* 3177

Bootstrap percolation transitions on real lattices *Paul M Kogut and P L Leath* 3187
An analysis and extension of the continuous time random walk method: I. Theory *V Halpern* 3195
An analysis and extension of the continuous time random walk method: II. The AC conductivity of some model disordered one-dimensional systems *V Halpern and M Sonnenschein* 3209
Electrical resistivity and Hall effect in the mixed system $Ti_{1-x}Hf_xSe_2$ *I Taguchi* 3221
Quantum versus classical domain walls in the Ising chain with a transverse field *P Prelovšek and I Sega* 3231
EPR spectra of Cr^{3+} centres in crystals of Cs_2CdCl_4 *Dennis Kay and Gary L McPherson* 3247
Energy levels of cobalt in ZnSe and ZnS *J M Noras, H R Szawelska and J W Allen* 3255
Calculation of the zero-temperature Auger recombination rate in the quaternary semiconductor alloy GaAlAsSb *M G Burt* 3269
Hole photoionisation cross sections for deep level impurities in silicon *Lars-Åke Ledebo* 3279
Origin of low-energy satellites in K x-ray spectra: II, β-region *A N Nigam and S N Soni* 3289

Surface Physics

A comparison of reliability (R) factors in a LEED strucutral analysis of the copper (111) surface *S P Tear, K Röll and M Prutton* 3297
Electronic properties of the annealed interface between Ag and 7 × 7 Si(111) *D Belmont, Ping Chen and C A Sebenne* 3313

NO 23, 20 AUGUST 1981

LETTERS TO THE EDITOR

Incompatibility of the 'local strain' and 'internal strain' approaches to cluster deformation in corundum *C S G Cousins* L677
Temperature-dependent vortex nucleation in isotopically pure superfluid ^4He *G G Nancolas, P V E McClintock, F E Moss and R M Bowley* L681
Isotope effects on the 969 meV vibronic band in silicon *G Davies and M Celeste do Carmo* L687
The observation of a sharp peak in the deep-level photoconductivity spectrum of GaAs (Cr) due to the Cr^{2+} ($^5T_2$–^5E) 'intracentre' transition *L Eaves, P J Williams and Ch Uihlein* L693
Pulsed photoconductivity in linear and quadratic recombination regimes *A S Siddiqui* L699
Spin glass as a percolation problem *R E Nettleton and M J Stephen* L707
Comment on empirical photoionisation thresholds for deep-level impurities in semiconductors *J M Noras* L713
Reply to 'Comment on empiricial photoionisation thresholds' *B K Ridley* L717
Acceptor bound exciton absorption and luminescence in germanium *E C Lightowlers and Zofia E Ciechanowska* L719

PAPERS

A theory of diffuse scattering of waves by ordered phases *Shinn-Tyan Wu* 3321
Radiation damage, its recovery and platinum lattice location in Pt-bombarded MgO *Hj Matzke, A Turos, P Rabette and O Meyer* 3333
Electron–phonon scattering in graphite intercalation compounds: a localised approach *F Guinea* 3345
Electron–phonon interaction in tetrahedrally bonded solids *J Sanchez-Dehesa, F Guinea and C Tejedor* 3355
Series expansion for the macroscopic conductivity of a random resistor network *David J Bergman and Yacov Kantor* 3365
A two-bond theory of conductivity in bond-disordered resistor networks *Takashi Nagatani* 3383
Charge-density waves in a strong magnetic field: II *B G S Doman* 3393
Quantum spin dynamics of the one-dimensional planar antiferromagnet *Gerhard Müller, Harry Thomas, Marcos W Puga and Hans Beck* 3399
Neutron diffraction study of the incommensurate magnetic phase of $Ni_{0.92}Zn_{0.08}Br_2$ *P Day, M W Moore, C Wilkinson and K R A Ziebeck* 3423
Cell-preserving magnetic phase transitions: the transitions in perovskite-type crystals and in beta uranium hydride *Alfred K Agyei* 3433
The no-phonon luminescence at 0.84 eV in GaAs: Cr—splitting under uniaxial stress *J Barrau, F Voillot, M Brousseau, J C Brabant and G Poiblaud* 3447

Surface Physics

Study of the W(Ta) core level shifts induced by the adsorption of oxygen on tungsten (tantalum) (110) *G Tréglia, M C Desjonquères, D Spanjaard, Y Lassailly, C Guillot, Y Jugnet, Tran Minh Duc and J Lecante* 3463

Localisation and the two-dimensional Hall effect *D J Thouless* 3475

NO 24, 30 AUGUST 1981

LETTERS TO THE EDITOR

Extended and localised electron states in a one-dimensional system with bond distortion *B R Bulka* L725

Failure of renormalisation group method in semiclassical limit *Daniel C Mattis and Rolf Schilling* L729

Exact equivalence of the Dzialoshinski–Moriya exchange interaction and quadratic spin anisotropies *Miguel Calvo* L733

Measurement of the critical exponent β by means of optical birefringence on the Heisenberg antiferromagnet $RbMnF_3$ *A Sabba Stenfanescu and P-J Becker* L737

Thermoluminescence and colour centre stability in KCl:Ba irradiated at room temperature *A Rascón and J L Alvarez Rivas* L741

PAPERS

Antiferrodistortive Jahn–Teller ordering in $KDy(MoO_4)_2$ *M J M Leask, A C Tropper and M R Wells* 3481

A generalisation of the locator coherent-potential approximation for alloys with short-range order *Jaime Rössler and Edmundo Lazo* 3499

Thermoelectric power studies of $Ag_7I_4AsO_4$ superionic conductor *M N Avasthi, M Saleem and M T El-Gemal* 3521

Structural relaxation in ferromagnetic glasses *Mucio A Continentino* 3527

Magnetostriction and deformation potentials in graphite *J Heremans, J-P Michenaud, M Shayegan and G Dresselhaus* 3541

Thermally stimulated polarisation and depolarisation currents (TSPC and TSDC) in $LiF:Mg^{2+}$ (TLD-100) *S W S McKeever and E Lilley* 3547

Clustering in rare-earth-doped alkaline earth fluorides *C G Andeen, J J Fontanella, M C Wintersgill, P J Welcher, R J Kimble Jr and G E Matthews* 3557

NO 25, 10 SEPTEMBER 1981

LETTERS TO THE EDITOR

Tricritical point in systems with randomly oriented local fields *V K Saxena* L745

Structural phase transition in $(ND_4)_2Se_2O_5$ *I S Vinogradova and B I Cherkasov* L751

Energies and electronic energy levels of lanthanide dioxides *Bogdan M Angelov* L757

Temperature-dependent dispersive transport in a-As_2Se_3 *A C Sharp and J M Marshall* L761

Raman scattering induced by V-centre aggregates in pure and Ca-doped KI x-irradiated at room temperature *E Rzepka, S Lefrant, L Taurel and A E Hughes* L767

Electronic excitations in tight-binding systems *J Rogan and J E Inglesfield* 3585

A new multicritical point in anisotropic magnets: II. Ferromagnet in a random skew field *Serge Galam and Amnon Aharony* 3603

^{13}C hyperfine structure and relaxation times of the P1 centre in diamond *R C Barklie and J Guven* 3621

Multiplet structure of 2p and 3p photoelectron spectra from low-spin and high-spin cobalt (III) compounds *I G Main, G A Robins and G Demazeau* 3633
Thermodynamics of an electron–hole plasma: study of phase transitions *Sanjeewani Jain and K V Dinesha* 3645
Probability density functions for collective coordinates in Ising-like systems *Alastair D Bruce* 3667

NO 26, 20 SEPTEMBER 1981

LETTERS TO THE EDITOR

Destruction of a first-order transition by dimensional crossover *Y Shnidman and Eytan Domany* L773
Approach to localisation in the one-dimensional Anderson model of disordered systems *K S Dy, S Y Wu and C Wongtawatnugool* L781
A note on the effective medium theory of random resistive–reactive medium *N Kumar and A M Jayannavar* L785
New mechanism for the electrical resistivity of layer compounds: TiS_2 *M Kaveh, M F Cherry and M Weger* L789
Effect of valence instability on the magnetic hyperfine interaction in $EuPt_3$ at very high pressure *M M Abd-Elmeguid and H Micklitz* L797
Polarisation dependent reflectivity of $ZrSe_3$ and $ZrTe_3$ *S C Bayliss and W Y Liang* L803

PAPERS

Molecular dynamics study of boron trioxide glass *M Amini, S K Mitra and R W Hockney* 3689
Low-temperature radiation damage studies in silicon by hopping conductance *S D Kouimtzi and P C Banbury* 3701
Eigenstates of an electron in ordered and disordered ensembles of scatterers: II. State vectors *H-J Unger* 3711
Eigenstates of an electron in ordered and disordered ensembles of scatterers: III. Application to systems of δ-potentials in one dimension *H-J Unger* 3727
Determination of universality classes for spin-dependent ensembles with time-reversal invariance *R Oppermann and K Jüngling* 3745
Critical localisation behaviour of spin-dependent ensembles with broken time-reversal invariance *R Oppermann* 3757
Fluctuations of magnetic moment in spin glass *P Rusek* 3769
Fluctuation effect and the spin-glass transition temperatures in the random-bond Ising models in the hexagonal, triangular, BCC and other lattices—unified description *Izuru Nagahara, Sumiyoshi Fujiki and Shigetoshi Katsura* 3781

Surface Physics

A method of embedding *J E Inglesfield* 3795
The mobility of bonds at metal surfaces *Roger Haydock* 3807

NO 27, 30 SEPTEMBER 1981

LETTERS TO THE EDITOR

The influence of electron–phonon coupling on the transition temperature into the SDW and CDW states *N I Kulikov and V V Tugushev* L809
Concerning the low-temperature electrical conductivity of silver chloride containing cadmium *G M Fryer* L815
DC conductance in a one-dimensional disordered system of finite length *D Lenstra and W van Haeringen* L819
2D random-axes *XY* magnet *V S Dotsenko and M V Feigelman* L823
Fourier transforms of dipole–dipole interactions using Ewald's method *G J Bowden and R G Clark* L827

Many commensurate phases in the chiral Potts or asymmetric clock models
Julia M Yeomans and Michael E Fisher L835
Absence of long-range order in systems with random p-fold anisotropies *Amnon Aharony* L841

PAPERS

On a variational property of the effective-medium approximation in the theory of liquid metals
K Niizeki 3817
The singlet–triplet Ising model: I. Application to simple fluids, nematic mixtures and ^{3}He–^{4}He mixtures *Jean Sivardière* 3829
The singlet–triplet Ising model: II. Liquid–gas equilibria in ternary mixtures *Jean Sivardière* 3845
A mathematical analysis of diffusion in dislocations: I. Application to concentration 'tails'
A D LeClaire and A Ravinovitch 3863
A theoretical study of defects in amorphous group-V semiconductors *E P O'Reilly and M J Kelly* 3881
Jahn–Teller effect of the B absorption band of Tl$^+$-type ions in a cubic field
Sumitada Asano and Yasuhiro Nakao 3897
The examination of correlated noise *R M Hill, L A Dissado and R Jackson* 3915
Low-temperature series expansions for the FCC Ising antiferromagnet
N D Mackenzie and A P Young 3927
Solitary waves in an anisotropic one-dimensional antiferromagnet with magnetoelastic coupling
R P Hodgson and J B Parkinson 3935
Electron paramagnetic resonance of InP:Co
J M Baker, L J C Bluck, B Cockayne and W R MacEwen 3953
Excitation probabilities and intermolecular interaction of host and guest molecules of a paired centre in a mixed organic crystal system *Ö Pekcan* 3957
Molecular motion and deuterium NMR spin echoes in solids
T B Smith, E A Moore and M Mortimer 3965

Surface Physics

Image-induced surface states on electronically dense metals *G Barton* 3975
Electron energy loss spectroscopy. Calculation of the impact scattering from W(100)p(1 × 1)H
G C Aers, T B Grimley, J B Pendry and K L Sebastian 3995

NO 28, 10 OCTOBER 1981

LETTERS TO THE EDITOR

The determination of the Huang–Rhys factor for a deep level in a semiconductor *M G Burt* L845
Electronic density of states of a stereo-irregular polyethylene *Miklós Kertész and György Göndör* L851
Application of the Kohn variational principle to a particle of effective mass m^* *K R Brownstein* L855
Mössbauer effect studies of ternary alloy systems Fe(Sb$_{1-x}$Te$_x$)$_2$ for $0 \leq x \leq 1$
Yogendra K Sharma, Bipin K Srivastava and S Lokanathan L859

PAPERS

Geometry and charge distribution of H centres in the fluorite structure
S Parker, K S Song, C R A Catlow and A M Stoneham 4009
Superionic phases of Ag$_3$SI: A microscopic model *Wanda Andreoni* 4017
Calculation of the mutual friction parameters in liquid helium II and the nature of the vortex core
A J Hillel 4027
The conductivity of strongly disordered two-dimensional systems *A Gold and W Götze* 4049
Stoichiometry dependence of the transport properties of TiS$_2$
P C Klipstein, A G Bagnall, W Y Liang, E A Marseglia and R H Friend 4067
The sign anomaly of the Hall effect in amorphous tetrahedrally bonded semiconductors: a chemical-bond orbital approach *M Grünewald, P Thomas and D Würtz* 4083
Ground state properties of frustrated Ising chains *J K Williams* 4095
The coherent non-linear light propagation in crystal in the exciton range of the spectrum
S N Belkin, P I Khadzhi, S A Moskalenko and A H Rotaru 4109

Infrared and Raman spectra of ReO_4^- isolated in alkali halides in CsCl structure *M R Mohammed and W F Sherman* 4121
Energy levels of silicon doped with iron *H R Szawelska and H Feichtinger* 4131
Optical properties of nickel (d^9) in GaP and ZnSe *H R Szawelska, J M Noras and J W Allen* 4141
The TR12 vibronic band in diamond *Gordon Davies, Colleen Foy and Kevin O'Donnell* 4153

Surface Physics

Temperature dependent metallic conductance above the mobility edge of a silicon inversion layer *H H J M Niederer, A P M Matthey and M J Sparnaay* 4167
Thermally activated conductance of a silicon inversion layer by electrons excited above the mobility edge *H H J M Niederer, A P M Matthey and M J Sparnaay* 4177

NO 29, 20 OCTOBER 1981

LETTERS TO THE EDITOR

Observation of a high-temperature phase transition in $(NH_4)_2SO_4$ from dielectric studies *U Syamaprasad and C P G Vallabhan* L865
Some features of self-diffusion in SnTe *D Shaw* L869
On the conductivity of magnetite below the Verwey transition *W R McKinnon, C M Hurd amd I Shiozaki* L877
New field theory formulation of localised states in disordered systems *S M Girvin, R W Rendell and G W Bryant* L881
The conductivity and Seebeck coefficient in the nearest-neighbour hopping regime of a Fermi glass *T E Whall* L887
Semiclassical theory of non-radiative transitions *T Markvart* L895

PAPERS

Subgroups of the magnetic axial point groups *Milan Damnjanović* 4185
Lattice dynamics of alkali hydrides and deuterides with the NaCl type structure *W Dyck and H Jex* 4193
Phase solitons of coupled condensate–lattice systems near the commensurate–incommensurate transition *E W Fenton* 4217
The characterisation of VSe_2: A study of the thermal expansion *G A Wiegers* 4225
Migration of V_k centres in CsI crystal *M Barland, E Duval and A Nouailhat* 4237
Electron localisation in finite quasi-one-dimensional systems *Richard Day and Frank Martino* 4247
Calculations of the 3 × 3 charge density wave state in a 2H layer compound *N J Doran and A M Woolley* 4257
A self-energy for the intermediate valence model *J Geldenhuys, M Roberts and K W H Stevens* 4269
The optical polaron bound in a Coulomb potential and its phase diagram *Naoki Tokuda, Hisashi Shoji and Kazuyuki Yoneya* 4281
Theory of spin polarised inhomogeneous relativistic electron gas *M V Raman and A K Rajagopal* 4291
Electric carriers and heat in semiconductors at high electronic temperature *M Wautelet* 4303
Magnetoelastic interaction in rare-earth systems: I. Crystal-field levels *I F Ginzburg and S P L Panfil* 4311
Magnetoelastic interaction in rare-earth systems: II. Specific heat, thermal expansion and elastic constants *I F Ginzburg and S P L Panfil* 4319
Vibrational study of hydrogen beta alumina *Ph Colomban, G Lucazeau and A Novak* 4325
Photoluminescence properties of Cu-doped GaSe *Vito Capozzi and Antonio Minafra* 4335
Correlation effects on Auger spectra in unfilled d band metals *G Tréglia, M C Desjonquères, F Ducastelle and D Spanjaard* 4347

Surface Physics

Polarisation of CdF_2 by blocking electrodes: I. Surface polarisation *A Kessler* 4357

NO 30, 30 OCTOBER 1981

LETTERS TO THE EDITOR

The recovery of internal friction in ultrapure, nominally pure and lightly doped sodium chloride crystals *G A Bielig* L901

Rigorous relations for the cross-over behaviour due to random perturbations *Yonathan Shapir and Amnon Aharony* L905

Pressure enhancement of the electrical conductivity of graphite intercalation compounds *Ctirad Uher* L911

On the completeness of Wiegmann's solution to the Kondo problem *Chain Choi Lai and Wu Yong-Shi* L915

Magnetic phase transition of second-stage $NiCl_2$–graphite intercalation compound in an external magnetic field *Masatsugu Suzuki and Hironobu Ikeda* L923

PAPERS

The defect structure of strontium chloride: I. Intrinsic and lightly doped crystals *P J Bendall, C R A Catlow and B E F Fender* 4377

Determination of the Fermi surface of $AuTe_2Br$ by Shubnikov–de Haas effect *B L Zhou, E Gmelin and R Villa* 4393

Polaron properties of exciton complexes *S Bednarek, J Adamowski and M Suffczyński* 4405

CPA approach for randomly diluted anisotropic ferromagnets: para-spin-flop critical field *F G Brady Moreira, I P Fittipaldi and R B Stinchcombe* 4415

NMR study of molecular motion in solid trimethyloxosulphonium halides *S Jurga, K Jurga and Z Pająk* 4433

Linear magnetic birefringence and double-excitonic transitions of the two-dimensional antiferromagnet $BaNiF_4$ *W Kleemann, F J Schäfer and J Nouet* 4447

Magneto-optical properties of the two-dimensional ferromagnet K_2CuF_4: II. Linear magnetic birefringence *W Kleemann, J Ferré and F J Schäfer* 4463

Resonant Brillouin scattering in cuprous oxide: theory *V C Y So, J E Sipe, M Fukui and G I Stegeman* 4487

Resonant Brillouin scattering in cuprous oxide: experiment *V C Y So, M Fukui, P J Thomas and G I Stegeman* 4505

Surface Physics

Existence of a surface-induced pressure in anisotropic crystals *M Rappaz and A Châtelain* 4515

Electron states at Cu surfaces *D W Bullett* 4521

Effect of annealing on the optical gap of a-Si:H *A Deneuville, A Mini and J C Bruyère* 4531

Surface layer in ferroelectric $KT_{1-x}Nb_xO_3$ *J P Ansermet, D Rytz, A Châtelain, U T Höchli and H E Weibel* 4541

NO 31, 10 NOVEMBER 1981

LETTERS TO THE EDITOR

The crystal structure of s-triazine at 5 K *S M Prasad, A I M Rae, A W Hewat and G S Pawley* L929

Direct observation of 'domain like' atomic arrangement of incommensurate 2d $Au_{3+}Zn$ by high-voltage–high-resolution electron microscopy *O Terasaki* L933

Anharmonicity, anisotropy, interlayer coupling and the re-entrant lock-in transition in 2H $TaSe_2$ *M O Steinitz and J Genossar* L939

Thermal conductivity of ^3He and ^4He crystals containing neon impurities *R Berman and D M Livesley* L945

The deep double donor P_{Ga} in GaP *U Kaufmann, J Schneider, R Worner, T A Kennedy and N D Wilsey* L951

The influence of the number of unoccupied 3d states on the $L_3M_{4,5}M_{4,5}$ Auger spectrum of Ni *P T Andrews, T Collins and P Weightman* L957

PAPERS

The effect of inner displacement on the collective coordinates of the tetrahedral cluster in GaAs *C S G Cousins* 4553

Analysis of proton tunnelling in KDP using a realistic proton potential *G N Robertson and M C Lawrence* 4559

Statistical mechanics of band states and impurity states in semiconductors *C-O Almbladh and G J Rees* 4575

Energy levels in ideal and reconstructed models of a silicon vacancy *M Heggie and R Jones* 4603

Dipole interference for optical transitions of ions in crystals in a transverse Zeeman field *C DeW Van Siclen* 4611

A percolation treatment of the conductivity for the high-temperature small-polaron hopping regime in disordered systems *G P Triberis and L R Friedman* 4631

Galvanomagnetic measurements in Fe_3O_4 *I Shiozaki, C M Hurd, S P McAlister, W R McKinnon and P Strobel* 4641

Raman scattering study of spin dynamics in the quasi-1D antiferromagnets $CsCoCl_3$ and $CsCoBr_3$ *W P Lehmann, W Breitling and R Weber* 4655

Light scattering by magnons in cadmium manganese telluride alloys *M Grynberg and M Picquart* 4677

Wavevector and spin reorientation in MnSi *M L Plumer and M B Walker* 4689

NMR study of molecular motions and disorder in K_3ZrF_7 and K_2TaF_7 *E C Reynhardt, J C Pratt, A Watton and H E Petch* 4701

ODMR observation of a quenching centre for the copper-green and other visible emission bands in zinc sulphide *J L Patel, J J Davies, J E Nicholls and B Lunn* 4717

Magneto-optical properties of Sm^{2+} ion in CaF_2 *T Tsuboi* 4727

X-ray absorption near edge structures of intermediate valence TmSe single crystals *A Bianconi, S Modesti, M Campagna, K Fischer and S Stizza* 4737

NO 32, 20 NOVEMBER 1981

LETTERS TO THE EDITOR

Critical neutron scattering in CeSb *B Hälg, A Furrer, W Hälg and O Vogt* L961

A neutron polarisation analysis study of the 'central' peak in single-crystal praseodymium *S K Burke, W G Stirling and K A McEwen* L967

Optical modes of vibration in non-stoichiometric LiF thin films *K Hisano* L973

Structural and dynamic properties of UO_2 at high temperatures *J R Walker and C R A Catlow* L979

A variational treatment of electron states in lattices with diagonal disorder *J P Hernandez* L985

On the oscillatory behaviour of velocity autocorrelation function of a 2D electron liquid *R K Kalia, P Vashishta, S W de Leeuw and A Rahman* L991

The observation of localisation and interaction effects in the two-dimensional electron gas of a GaAs–GaAlAs heterojunction at low temperatures *D A Poole, M Pepper and R Glew* L995

Critical ^{19}F NMR line broadening in the randomly dilute Ising antiferromagnet $Mn_{1-x}Zn_xF_2$ *R A Dunlap and A M Gottlieb* L1007

Critical phenomena in anti-parallel aligning ferrimagnets *R G Bowers* L1013

Vibrational fine structure in the optical spectra of $NiXF_6 . 6R_2O$ (X=Si, Ti; R=H, D) at low temperatures *S K Datta and D De* L1019

Photons at non-zero chemical potential *P T Landsberg* L1025

PAPERS

Structure and molecular correlation functions in liquid neopentane *R V Gopala Rao and R N Joarder* 4745

Internal strain effects and the reduction of the number of ion–lattice interaction parameters *G E Stedman and R A Minard* 4753

Microscopic theory for ^3He B hydrodynamics *R Combescot* 4765

On the origin of the split-off conduction bands of V_2O_5 *W Lambrecht, Bahram Djafari-Rouhani and Joost Vennik* 4785

Electronic structure of the F centre in a sodium fluoride crystal *J J Sundquist and Chu C Lin* 4797

Transport properties of conducting and semiconducting anisotropic mixtures *J P Troadec, D Bideau and E Guyon* 4807
On the effect medium theory of random linear networks *J Koplik* 4821
Multi-bond expansions for the effective conductivity in bond-disordered resistor networks *T Nagatani* 4839
Static correlations in one-dimensional easy-axis magnets *M Cieplak and A Kryszeń* 4849
Dynamical correlations in one-dimensional easy-plane magnets *M Cieplak and A Sjölander* 4861
Influence of temperature and iron concentration on the ESR spectrum of tetragonal and orthorhombic Fe^{3+} centres in MgO *R S de Biasi* 4885
Infrared absorption of Al–Li defect pairs in ZnSe and CdTe *J S Ko and W G Spitzer* 4891
Vibrational properties of the F centre absorption in alkali halides *F Dochy* 4907
Optical study of Eu^{3+} centres in CdF_2 *J P Jouart, C Bissieux, M Egee, G Mary and M de Murcia* 4923

Surface Physics

Rydberg resonances in spin polarised LEED *G Malmström and J Rundgren* 4937
Image-induced surface state on metals; the effects of spatial dispersion *G Barton and M Babiker* 4951
The vibration spectrum of hydrogen bound by molybdenum sulphide catalysts *C M Sayers* 4969

NO 33, 30 NOVEMBER 1981

LETTERS TO THE EDITOR

Potts model and phase transition in lead phosphate $Pb_3(PO_4)_2$ *E Salje and V Devarajan* L1029
Green function solution for two hybridised electron bands *Enrique V Anda* L1037
Effect of the matrix elements on the permittivity of ZrS_2 *H M Isomäki and J von Boehm* L1043
Self-consistent theory of localisation in binary alloys *A Brezini and G Olivier* L1049
Transport properties of VSe_2 intercalated with hydrazine *M Sarma, A Ghorayeb, S Nulsen and R H Friend* L1055
Comments on the interplay between Anderson localisation and electron–electron interactions *John Kimball* L1061
Critical temperatures for models with random distribution of Ising and Heisenberg-like spins *A Komoda and A Pękalski* L1067

PAPERS

The dynamics of particular points on a polymer chain *M Warner* 4985
Separation of the motion around cross-link points from main chain motion in network samples *J S Higgins, K Ma and R H Hall* 4995
Anharmonic interaction in mixed $ZnS_{1-z}Se_z$ crystals *D Schmeltzer and R Beserman* 5003
The structure and optical activity of the paraelectric phase of dicalcium strontium propionate *A M Glazer, K Stadnicka and S Singh* 5011
First-order order-disorder transition in lithium ferrospinel *L Dobrzyński and J Przystawa* 5031
The energy of formation of alkali metal ion interstitials in zinc selenide *J H Harding* 5049
Approximate pseudopotential calculation of the Z_1 centre in alkali halides *J Adetunji and C K Ong* 5055
An energy scheme for interpreting deep-level photoconductivity and other recent optical measurement for Fe-doped InP *L Eaves, A W Smith, P J Williams, B Cockayne and W R MacEwan* 5063
Optical and capacitance spectroscopy of InP:Fe *P R Tapster, M S Skolnick, R G Humphreys, P J Dean, B Cockayne and W R MacEwan* 5069
Dimers and clusters in $CaF_2:Pr^{3+}$. Laser selective excitation and time-resolved spectroscopy *R H Petit, P Evesque and J Duran* 5081
Electronic structure of $(SN)_x$ and its intercalate $(SNBr_y)_x$ *A Oshiyama and H Kamimura* 5091
Theory of electrical resistivity in an interacting two-carrier system: application to $(SN)_x$ and $(SNBr_y)_x$ *A Oshiyama* 5109
The Hall mobility in hopping conduction *B Movaghar, B Pohlmann and D Wurtz* 5127
Hot electrons in non-polar liquids *V M Atrazhev and I T Iakubov* 5139

Energy-loss mechanisms of hot electrons in n-InSb *K Shimomae, Y Hirose and C Hamaguchi* 5151
A neutron diffraction study of weak ferromagnetism in nickel fluoride *P J Brown and J B Forsyth* 5171
Spin–lattice relaxation by diffusion in amorphous Si:H *B Movaghar and L Schweitzer* 5185
Scattering properties of ferroelectric domain walls *David A Bruce* 5195
Raman study of orientational dynamics of sulphate ions in potash alum
A K Sood, A K Arora, S Dattagupta and G Venkataraman 5215

No 34, 10 DECEMBER 1981

LETTERS TO THE EDITOR

New metastable absorption bands in KBr *G Giuliani, S Malusà and V Mitra* L1073
Diffusion on a directed percolating network *Michael J Stephen* L1077
Observation of surface optical phonons on $SrTiO_3(100)$
A D Baden, P A Cox, R G Egdell, A F Orchard and R J D Willmer L1081
The TAP equations revisited: a qualitative picture of the SK spin glass model *A P Young* L1085
The Dy^{3+} ion ground state in antiferrodistorted dysprosium potassium molybdate: $KDy(MoO_4)_2$
M J M Leask, Z-D Luo and A C Tropper L1089

PAPERS

A self-consistent theory of inhomogeneous liquid metals: Calculations of the electron and ion density profiles and the liquid–vapour surface tension of the alkali metals *R Evans and M Hasegawa* 5225
Structural studies of boracites: VI. The cubic phase of cobalt iodine boracite, $Co_3B_7O_{13}I$, and of copper bromine boracite, $Cu_3B_7O_{13}Br$ *R J Nelmes and W J Hay* 5247
Structural studies of boracites: VII. Cadmium sulphur boracite at room temperature
R O Gould, R J Nelmes and S E B Gould 5259
Incommensurability and recursivity: Lattice dynamics of modulated crystals
C de Lange and T Janssen 5269
On the problem of DC conductivity at $T = 0K$ in a one-dimensional system of finite length: calculation of the scattering rate in case of weak disorder *D Lenstra and W van Haeringen* 5293
Superconductivity in the family of organic salts based on the tetramethyltetraselenafulvalene (TMTSF) molecule: $(TMTSF)_2X$ ($X = ClO_4, PF_6, AsF_6, SbF_6, TaF_6$)
S S P Parkin, M Ribault, D Jérome and K Bechgaard 5305
Neutron scattering investigation of the temperature dependence of long-wavelength spin waves in ferromagnetic Rb_2CrCl_4 *M T Hutchings, J Als-Nielsen, P A Lindgard and P J Walker* 5327
Theory of elementary excitations in ferromagnetic semiconductors *A Babcenco and M G Cottam* 5347
Breakdown of screening in Voigt cyclotron resonance *S W McKnight and H D Drew* 5367

Surface Physics

Theoretical study of metal overlayer thickness effects on the electronic properties of metal–semiconductor interfaces *P Masri and P Langlade* 5379
The surface structure of Mo(110) determined by LEED *L Morales de la Garza and L J Clarke* 5391
A reversible phase transition in carbon segregation to W(110)
S D Foulias, K J Rawlings and B J Hopkins 5403
A model for carburised W(100) and W(110) *K J Rawlings, S D Foulias and B J Hopkins* 5411

NO 35, 20 DECEMBER 1981

LETTERS TO THE EDITOR

New clusters for the real-space renormalisation group *N-C Chao* L1093
A simple extension of the pair approximation to AC hopping conductivity in disordered systems to embrace the DC limit *P N Butcher and S Summerfield* L1099
Photoemission and magnetic effects in $NaCrS_2$
H P Hughes, A W Parke, R H Williams and J J Barry L1103
Corrigenda L1111

PAPERS

Broken hexagonal symmetry in the locked-in state of 2Ha-TaSe$_2$ and the discommensurate microstructure of its incommensurate CDW states *K K Fung, S McKernan, J W Steeds and J A Wilson* 5417

Spatially modulated phases of a one-dimensional lattice model with competing interactions *F Axel and S Aubry* 5433

Phenomenological coefficients for matter transport by vacancies from linear response theory: I. Derivation of Manning's equations for the impurity correlation factor *A R Allnatt* 5453

Phenomenological coefficients for matter transport by vacancies from linear response theory: II. Completion of the five-frequency model *A R Allnatt* 5467

Transition metal silicides: aspects of the chemical bond and trends in the electronic structure *O Bisi and C Calandra* 5479

Exactly solvable localisation model *M Ya Azbel* 5495

Velocity operator and strong-field Hall effect for non-parabolic bands of the type $\varepsilon(1 + \varepsilon/\varepsilon_G)$ *O P Hansen* 5501

Thermodynamics of electron–ion liquids and their response to external fields and thermal gradients *W Jones* 5505

The transition temperature of Cu nuclei to an ordered state *K J Niskanen and J Kurkijärvi* 5517

The pseudoquadrupole effect in cubic ferromagnets *G A Gehring and A B Walker* 5523

Direct optically detected magnetic resonance observation of a copper centre associated with the green emission in ZnSe *J L Patel, J J Davies and J E Nicholls* 5545

Infrared studies of phonons and free carriers in CaAs$_3$, SrAs$_3$, BaAs$_3$ and α-EuP$_3$ *B Oleś and H G von Schnering* 5559

Valence states of titanium atoms in non-stoichiometric carbides: x-ray emission spectra and cluster calculations *V A Gubanov, E Z Kurmaev and D E Ellis* 5567

Surface Physics

Theoretical studies of underlayer chemisorption I: electronic structure of Ti$_6$ and Ti$_6$N clusters *K Shinjo, S Ohnishi, M Tsukada and S Sugano* 5575

Electronic damping of a vibrating dipole near a metal *B N J Persson and W L Schaich* 5583

Enhanced Brillouin scattering involving surface plasmon polaritons *M Fukui, O Tada, V C Y So and G I Stegeman* 5591

NO 36, 30 DECEMBER 1981

LETTERS TO THE EDITOR

Outer core spectra of Cs and Rb on Mg surfaces *J E Cunningham, Doon Gibbs, T H Chiu and C P Flynn* L1113

Response of simple metals to surface core excitations *Doon Gibbs, J E Cunningham, T H Chiu and C P Flynn* L1119

Crystal field effects on the magnetic susceptibility of mixed valence systems *J C Mohanty, P K Misra and S D Mahanti* L1125

Many-electron interactions in the M_{45}-NN Auger spectrum of metallic cadmium *M Ohno and J-M Mariot* L1133

PAPERS

Domain-wall-like excitations in a discrete one-dimensional anharmonic lattice model *P Prelovšek and I Sega* 5609

Quasiclassical theory of ions in ^{3}He *E V Thuneberg, J Kurkijärvi and D Rainer* 5615

On the incompatibility of Peierls and Cooper instabilities in a set of coupled chains *Chr Seidel and V N Prigodin* 5625

Self-dual cluster renormalisation-group approach for the square lattice Ising model: specific heat and magnetisation *H O Mártin and C Tsallis* 5645

Electron spin resonance imaging of paramagnetic centres in solids *M J R Hoch* 5659

Electron paramagnetic resonance spectra of Fe^{3+} ions in C$_{1h}$ sites in strontium oxide *A F M Y Haider* 5667

Multipulse NMR investigation of band structure in titanium hydride: proton Knight shift and spin–lattice relaxation *R Göring, R Lukas and K Bohmhammel* 5675
Temperature study of interband magnetoabsorption in $Hg_{1-x}Mn_xTe$ mixed crystals *M Dobrowolska and W Dobrowolski* 5689
Irreducible analysis of Raman spectra for all crystal point groups *C D Churcher and G E Stedman* 5707
The no-phonon luminescence at 0.84 eV in GaAs:Cr. The ground set of states *F Voillot, J Barrau, M Brousseau and J C Brabant* 5725

Surface Physics

Logarithmic corrections to two-dimensional transport in silicon inversion layers *M J Uren, R A Davies, M Kaveh and M Pepper* 5737
Oxidation of the Zn(0001) surface *T C Gainey and B J Hopkins* 5763

Subject index

The 1981 subject index is based upon the ICSU/AB International Classification for Physics; articles are listed, as appropriate, under one or more of the following headings:

00.00	**GENERAL**
02.00	MATHEMATICAL METHODS IN PHYSICS
02.20	Group theory
05.00	STATISTICAL PHYSICS AND THERMODYNAMICS

78.90	Other topics in optical properties of condensed matter and other interactions of matter with particles and radiation
79.00	ELECTRON AND ION EMISSION BY LIQUIDS AND SOLIDS; IMPACT PHENOMENA
79.20	Impact phenomena
79.60	Photoemission and photoelectron spectra
79.70	Field emission and field ionisation

00.00 GENERAL

02.00 MATHEMATICAL METHODS IN PHYSICS

02.20 Group theory

The non-compact group O(2, 1) and the Jahn–Teller effect *B R Judd* C375

Subgroups of the magnetic axial point groups *M Damnjanović* C4185

Irreducible analysis of Raman spectra for all crystal point groups *C D Churcher and G E Stedman* C5707

05.00 STATISTICAL PHYSICS AND THERMODYNAMICS

Role of non-topological solitons in statistical mechanics of 1D complex scalar fields with phase anisotropy *S Ohta and K Nakamura* CL427

05.50 Lattice theory and statistics, Ising problems

Monte Carlo simulation of directed percolation on a square lattice *D Dhar and M Barma* CL1

Statistics of the percolation threshold *F G Karioris and K S Mendelson* C321

Exact critical condition for a site-diluted Potts model *I Kondor and T Temesvári* CL97

Renormalisation group treatment of bond percolation in anisotropic and 'inhomogeneous' planar lattices *A C N de Magalhães, C Tsallis and G Schwachheim* C1393

A real-space renormalisation group for the triangular lattice *N-C Chao* CL473

Kadanoff–Migdal treatment of the dilute *q*-state Potts model close to the percolation fixed point *K De' Bell* CL589

Bootstrap percolation transitions on real lattices *P M Kogut and P L Leath* C3187

Diffusion on a directed percolating network *M J Stephen* CL1077

New clusters for the real-space renormalisation group *N-C Chao* CL1093

60.00 CONDENSED MATTER: STRUCTURE, THERMAL AND MECHANICAL PROPERTIES

61.00 STRUCTURE OF LIQUIDS AND SOLIDS; CRYSTALLOGRAPHY

61.10 X-ray determination of structures

Potential energy calculations of molecular and crystal structures in Fourier space *Hans Bradaczek* C1

The theory of superlattice critical scattering *A D Bruce* C193

Properties of polycrystalline silicon prepared by chemical transport in hydrogen plasma at temperatures between 80 and 400°C *S Veprek, Z Iqbal, H R Oswald and A P Webb* C295

Inelastic scattering of fast electrons by spherical surfaces *M Schmeits* C1203

Theory of diffraction pattern of silver-chalcogenide-type superionic conductors *Y Tsuchiya* C1409

The crystal structure of phase I of bicyclo (2.2.2) octane at 265K *J L Sauvajol and J P Amoureux* C1537

Structural studies of boracites: VI. The cubic phase of cobalt iodine boracite, $Co_3B_7O_{13}I$, and of copper bromine boracite, $Cu_3B_7O_{13}Br$ *R J Nelmes and W J Hay* C5247

Structural studies of boracites: VII Cadmium sulphur boracite at room temperature *R O Gould, R J Nelmes and S E B Gould* C5259

61.12 Neturon determination of structures

The theory of superlattice critical scattering *A D Bruce* C193

Calculation of the frequency distribution function of solids using the 'unfolding technique' *U Malik and L S Kothari* C581

Spin alignment of protons in NH_4^+ at low temperatures *H Friedrich, K Guckelsberger, R Scherm and A Hüller* CL147

The temperature dependence of methyl tunnelling motion in three acetates *S Clough, A Heidemann and M Paley* C1001

A kinetic theory of the temperature dependence of methyl tunnelling spectra *S Clough* C1009

Structural studies of deuterated CsH_2AsO_4 in its paraelectric and ferroelectric phases *W J Hay and R J Nelmes* C1043

A powder neutron diffraction study of stoichiometric silver beta alumina at 4.2K *J M Newsam and B C Tofield* C1545

High resolution studies of cubic perovskites by elastic neutron diffraction II: $SrTiO_3$, $KMnF_3$, $RbCaF_3$ and $CsPbCl_3$ *J Hutton and R J Nelmes* C1713

Intermolecular correlations in plastic crystals: one more step in the calculation of the static susceptibility $\chi(q)$ *M Descamps and G Coulon* C2297

Neutron study of the incommensurate phase in $(N(CD_3)_4)_2ZnCl_4$ crystal *G Marion, R Almairac, J Lefebvre and M Ribet* C3177

61.14 Electron determination of structures
- Gauss–Seidel–Aitken perturbation expansions for interlayer multipole scattering in LEED: bootstrap acceleration method *D L Adams* C789
- Spin-polarised low-energy electron diffraction *R Feder* C2049
- A comparison of reliability (*R*) factors in a LEED structural analysis of the copper (111) surface *S P Tear, K Röll and M Prutton* C3297
- Rydberg resonances in spin polarised LEED *G Malmström and J Rundgren* C4937
- The surface structure of Mo(110) determined by LEED *L Morales de la Garza and L J Clarke* C5391

61.16 Other determination of structures
- Direct observation of 'domain like' atomic arrangement of incommensurate 2d $Au_{3+}Zn$ by high-voltage–high-resolution electron microscopy *O Terasaki* CL933
- Broken hexagonal symmetry in the locked-in state of 2Ha-$TaSe_2$ and the discommensurate microstructure of its incommensurate CDW states *K K Fung, S McKernan, J W Steeds and J A Wilson* C5417

61.20 Classical, semiclassical, and quantum theories of liquid structure
- Atomic dynamics and momentum transfer in dense liquids *T Gaskell and P E Mason* C561
- Dynamical coupling in simple molten salts *F Yoshida* C573
- On the equivalence of two models of charged hard spheres in a uniform background *J-P Hansen* CL151
- A basis for the Ashcroft–Langreth prescription for effective atomic diameters in liquids *M Silbert and W H Young* C2425
- The role of attractive forces in the structure of simple liquids: a theory for small-angle scattering *R Evans and T J Slucklin* C2569
- A contribution to the second-order perturbation theory of the one-electron properties of liquid metals *K Niizeki* CL655
- The long-wavelength behaviour of the structure factor of liquid alkali metals *R Evans and T J Sluckin* C3137
- A self-consistent theory of inhomogenous liquid metals: Calculations of the electron and ion density profiles and the liquid–vapour surface tension of the alkali metals *R Evans and M Hasegawa* C5225

61.25 Studies of specific liquid structures
- Possible layered structure in liquid CH_4–N_2 mixtures *M Falk and R Stoner* CL65
- The structure of molten zinc chloride *S Biggin and J E Enderby* C3129
- The structure of molten calcium chloride *S Biggin and J E Enderby* C3577
- Structure and molecular correlation functions in liquid neopentane *R V Gopala Rao and R N Joarder* C4745

61.40 Amorphous and polymeric materials
- Random glass structure and electron localisation in amorphous V_2O_5 *M Henri, C Sanchez, C R' Kha and J Livage* C829
- Molecular dynamics study of boron trioxide glass *M Amini, S K Mitra and R W Hockney* C3689
- On a variational property of the effective-medium approximation in the theory of liquid metals *K Niizeki* C3817
- The dynamics of particular points on a polymer chain *M Warner* C4985
- Separation of the motion around cross-link points from main chain motion in network samples *J S Higgins, K Ma and R H Hall* C4995

61.50 Crystalline state
- Coupling coefficients for the marcasite structure *H Kunert and M Zimpel* C801

61.60 Specific structures: inorganic compounds
- A powder neutron diffraction study of stoichiometric silver beta alumina at 4.2K *J M Newsam and B C Tofield* C1545
- Superionic phases of Ag_3SI: A microscopic model *W Andreoni* C4017
- The structure and optical activity of the paraelectric phase of dicalcium strontium propionate *A M Glazer, K Stadnicka and S Singh* C5011
- Structural studies of boracites: VI. The cubic phase of cobalt iodine boracite, $Co_3B_7O_{13}I$, and of copper bromine boracite, $Cu_3B_7O_{13}Br$ *R J Nelmes and W J Hay* C5247
- Structural studies of boracites: VII. Cadmium sulphur boracite at room temperature *R O Gould, R J Nelmes and S E B Gould* C5259

61.65 Specific structures: organic compounds
- The crystal structure of phase I of bicyclo (2.2.2) octane at 265K *J L Sauvajol and J P Amoureux* C1537
- The crystal structure of s-triazine at 5K *S M Prasad, A I M Rae, A W Hewat and G S Pawley* CL929

61.70 Defects in crystals
- Studies of effects of trivalent impurity ions on the transition to the superionic state of fluorites *C R A Catlow, J D Comins, F A Germano, R T Harley, W Hayes and I B Owen* C329

An apparent radiation induced F-centre diffusion process in NaCl at and above room temperature *E R Hodgson, A Delgado and J L Alvarez Rivas* C337

The thermodynamics of characteristic defect parameters *C R A Catlow, J Corish, P W M Jacobs and A B Lidiard* CL121

Radiogenic Sn defects in ion implanted InP *S Damgaard, J W Petersen and G Weyer* C993

The stages of nitrogen aggregation in diamond *T Evans, Z Qi and J Maguire* CL379

The nature of dangling bonds at line defects in covalent semiconductors *M J Kirton and M Jaros* C2099

Point defect activation volumes in the alkaline-earth fluorides *J J Fontanella, M C Wintersgill, A V Chadwick, R Saghafian and C G Andeen* C2451

Relaxations and their strain derivatives around impurity ions in MgO *M J L Sangster* C2889

Direct calculation of force constant changes around impurities in crystals *M J L Sangster, D K Rowell and A S Ashman* C2899

Calculations of intrinsic defect energies in the alkali halides *D K Rowell and M J L Sangster* C2909

Geometry and charge distribution of H centres in the fluorite structure *S Parker, K S Song, C R A Catlow and A M Stoneham* C4009

The defect structure of strontium chloride: I. Intrinsic and lightly doped crystals *P J Bendall, C R A Catlow and B E F Fender* C4377

The energy of formation of alkali metal ion interstitials in zinc selenide *J H Harding* C5049

61.80 Radiation damage and other irradiation effects

An investigation of solid solutions of hydrogen in thulium at low temperature and of their behaviour under electron irradiation *J N Daou, P Vajda, A Lucasson and P Lucasson* C129

An apparent radiation induced F-centre diffusion process in NaCl at and above room temperature *E R Hodgson, A Delgado and J L Alvarez Rivas* C337

Low-temperature specific heat of neutron-irradiated crystalline quartz *M Saint-Paul and J C Lasjaunias* CL365

Effect of electron irradiation on the non-linear properties of NbSe$_3$ *P Monceau, J Richard and R Lagnier* C2995

The low-temperature behaviour of annealed, quenched or irradiated solid solutions of hydrogen in erbium *J N Daou, P Vajda, A Lucasson and P Lucasson* C3155

Radiation damage, its recovery and platinum lattice location in Pt-bombarded MgO *Hj Matzke, A Turos, P Rabette and O Meyer* C3333

Thermoluminescence and colour centre stability in KCl:Ba irradiated at room temperature *A Rascón and J L Alvarez Rivas* CL741

Raman scattering induced by V-centre aggregates in pure and Ca-doped KI x-irradiated at room temperature *E Rzepka, S Lefrant, L Taurel and A E Hughes* CL767

Low-temperature radiation damage studies in silicon by hopping conductance *S D Kouimtzi and P C Banbury* C3701

New metastable absorption bands in KBr *G Giuliani, S Malusà and V Mitra* CL1073

62.00 MECHANICAL AND ACOUSTIC PROPERTIES OF CONDENSED MATTER

62.20 Mechanical properties of solids

62.20D Elastic constants

Pressure dependences of the elastic constants of PbTe, SnTe and $Ge_{0.08}Sn_{0.92}Te$ *A J Miller, G A Saunders and Y K Yogurtçu* C1569

62.20F Deformation and plasticity

The corundum structure: internal strain tensors and cluster configurations under stress *C S G Cousins* C1585

Incompatibility of the ‘local strain’ and ‘internal strain’ approaches to cluster deformation in corundum *C S G Cousins* CL677

The effect of inner displacement on the collective coordinates of the tetrahedral cluster in GaAs *C S G Cousins* C4553

62.20M Fatigue, brittleness, fracture, and cracks

Computer simulation of crack propagation: lattice trapping *A Paskin, D K Som and G J Dienes* CL171

62.30 Mechanical and elastic waves

A theory of diffuse scattering of waves by ordered phases *S-T Wu* C3321

62.40 Anelasticity, internal friction, and mechanical resonances

The recovery of internal friction in ultrapure, nominally pure and lightly doped sodium chloride crystals *G A Bielig* CL901

62.65 Acoustic properties of solids

Acoustic relaxation due to Ni^{3+} ions in Al_2O_3 *A Bankovskis, P J King and D J Monk* C697

63.00 LATTICE DYNAMICS AND CRYSTAL STATISTICS

63.10 General theory

On lattice dynamical shell model parameters *J D Pirie and J S Reid* C2581

63.20 Phonons and vibrations in crystal lattices

Phonon linewidths in $Nb_{1-c}Mo_c$ alloys *G Grunewald* C595

Pressure dependence of phonon energies in d_8-naphthalene *U Schmelzer, E L Bokhenhov, B Dorner, J Kalus, G A Mackenzie, I Natkaniec, G S Pawley and E F Sheka* C1025

The phonon frequency distribution of the three modifications of NaCN *N Nücker, J Daubert, H Jex, M Müllner and J-B Suck* C1217

Comments on the phonon spectra of covalent semiconductors *P E Van Camp, V E Van Doren and J T Devreese* C1421

The neutron scattering function $S(Q, \omega)$ from adamantane *C G Windsor, J C Damien, J Lefebvre and R M Richardson* C1555

Group theoretical classification of vibrations in the $[Ni(NH_3)_6](ClO_4)_2$ $[Ni(NH_3)_6]$ $(BF_4)_2$ and $[Ni(NH_3)_6](PF_6)_2$ crystals *A Kulczycki* C2433

The correlation of methyl tunnelling and thermally activated reorientation *S Clough, A Heidemann, A J Horsewill, J D Lewis and M N J Paley* CL525

Generalised phonon density of states of the layer compounds Bi_2Se_3, Bi_2Te_3, Sb_2Te_3 and $Bi_2(Te_{0.5}Sb_{0.5})_3$, $(Bi_{0.5}Sb_{0.5})_2Te_3$ *H Rauh, R Geick, H Köhler, N Nücker and N Lehner* C2705

A single-site theory for binary alloys with environmental and off-diagonal disorder *D J Whitelaw* C2871

Low-temperature phonon dynamics of a classical compressible Heisenberg chain *J Fivez, B De Raedt and H De Raedt* C2923

Lattice dynamics of alkali hydrides and deuterides with the NaCl type structure *W Dyck and H Jex* C4193

Incommensurability and recursivity: Lattice dynamics of modulated crystals *C de Lange and T Janssen* C5269

63.20K Phonon–electron interactions

Electron–phonon interaction and composition-dependent phonon anomaly in CeH_x *A Fujimori and N Tsuda* CL69

Determination of potential surfaces from multiphonon transition rates *T Markvart* CL435

63.50 Vibrational states in disordered systems

Diffuse Umklapp scattering in amorphous metals *J Hafner* CL287

Dynamical structure factor and vibrational density of states of the metallic glass $Mg_{70}Zn_{30}$ measured at room temperature *J-B Suck, H Rudin, H-J Güntherodt and H Beck* C2305

Viscosity of the gas of phonons for polycrystalline dielectric crystals *T Paszkiewicz* CL501

Anharmonic interaction in mixed $ZnS_{1-z}Se_z$ crystals *D Schmeltzer and R Beserman* C5003

Domain-wall-like excitations in a discrete one-dimensional anharmonic lattice model *P Prelovšek and I Sega* C5609

64.00 EQUATIONS OF STATE, PHASE EQUILIBRIA, AND PHASE TRANSITIONS

64.60 General studies of phase transitions

Structural phase transitions in crystals with $P6_3/mmc$ symmetry *J M Pérez-Mato, J L Mañes, M J Tello and F J Zúñiga* C1121

Derivative coupling and ordering in a system of coupled linear chains *I Batistić, G Theodorou and S Barišić* C1905

Two-dimensional jump singularities from critical filaments in three-dimensional spectral problems *A A Bahurmuz and P D Loly* C1911

Critical and tricritical points near the Potts model transition of uniaxially stressed $SrTiO_3$ *D Blankschtein and A Aharony* C1919

Topological order in an $n = 4$ vector model *T Nattermann* C2441

Melting transition of small molecular clusters *P Sheng, R W Cohen and J R Schrieffer* CL565

Crossover in the two-dimensional Coulomb gas *A P Young and T Bohr* C2713

Destruction of a first-order transition by dimensional crossover *Y Shnidman and E Domany* CL773

Many commensurate phases in the chiral Potts or asymmetric clock models *J M Yeomans and M E Fisher* CL835

The singlet–triplet Ising model: I. Application to simple fluids, nematic mixtures and ^3He–^4He mixtures *J Sivardière* C3829

The singlet–triplet Ising model: II Liquid–gas equilibria in ternary mixtures *J Sivardière* C3845

Rigorous relations for the cross-over behaviour due to random perturbations *Y Shapir and A Aharony* CL905

Spatially modulated phases of a one-dimensional lattice model with competing interactions *F Axel and S Aubry* C5433

On the incompatibility of Peierls and Cooper instabilities in a set of coupled chains *Chr Seidel and V N Prigodin* C5625

64.70 Phase equilibria, phase transitions, and critical points of specific substances

64.70D Solid–liquid transitions

Relation between the Kraut–Kennedy melting law and the Simon fusion equation at high pressures *Do Yi-Jing* CL103

64.70K Solid–solid transitions

Commensurate–incommensurate transition: on the coupling between phase solitons and strain *H-J Brocksch, H U Everts and H Muller-Krumbhaar* C603

Differential scanning calorimetric and Mössbauer studies of phase transitions in $[N(CH_3)_4]_2FeCl_4$ *M D Sastry, U R K Rao, K H Madraswala and B D Joshi* C615

Excitations in commensurate and incommensurate $BaMnF_4$: a light scattering study *D J Lockwood, A F Murray and N L Rowell* C753

Physical properties and phenomenological theory around the successive high-temperature phase transitions of $(C_2H_5NH_3)_2CuCl_4$ *M J Tello, J L Mañes, J Fernandez, M A Arriandiaga and J M Perez-Mato* C805

A Raman study of the phase transition in hexa-ammine nickel (II) chloride *T E Jenkins and A R Bates* C817

Quasi-elastic light scattering at the order–disorder phase transition in ammonium chloride *S R Andrews and R T Harley* CL207

The influence of a secondary order parameter on the incommensurate–commensurate transition *T Nattermann and S Trimper* C1603

Structural phase transitions in K_2CO_3 *A Maciel, J F Ryan and P J Walker* C1611

DC electrical conductivity and phase transitions in $(NH_4)_3H(SO_4)_2$ *U Syamaprasad and C P G Vallabhan* CL571

Room temperature reflectivity and thermoreflectance spectra of 1T VSe_2 *A Gustinetti and G Campagnoli* CL609

Calorimetric study of the ferroelectric $(N(CH_3)_4)_2ZnCl_4$: critical behaviour of the commensurate–incommensurate phase transition *I Ruiz Larrea, A López-Echarri and M J Tello* C3171

Antiferrodistortive Jahn–Teller ordering in $KDy(MoO_4)_2$ *M J M Leask, A C Tropper and M R Wells* C3481

Structural phase transition in $(ND_4)_2Se_2O_5$ *I S Vinogradova and B I Cherkasov* CL751

Observation of a high-temperature phase transition in $(NH_4)_2SO_4$ from dielectric studies *U Syamaprasad and C P G Vallabhan* CL865

Phase solitons of coupled condensate–lattice systems near the commensurate–incommensurate transition *E W Fenton* C4217

Anharmonicity, anisotropy, interlayer coupling and the re-entrant lock-in transition in 2H $TaSe_2$ *M O Steinitz and J Genossar* CL939

Analysis of proton tunnelling in KDP using a realistic proton potential *G N Robertson and M C Lawrence* C4559

Potts model and phase transition in lead phosphate $Pb_3(PO_4)_2$ *E Salje and V Devarajan* CL1029

First-order order–disorder transition in lithium ferrospinel *L Dobrzyński and J Przystawa* C5031

65.00 THERMAL PROPERTIES OF CONDENSED MATTER

65.40 Heat capacities of solids

Detection of tunnelling systems in Li_3N by excess specific heat *E Gmelin and K Guckelsberger* CL21

Low-temperature specific heat of neutron-irradiated crystalline quartz *M Saint-Paul and J C Lasjaunias* CL365

The thermal conductivity and specific heat of epoxy-resin from 0.1–80K *S Kelham and H M Rosenberg* C1737

65.50 Thermodynamic properties and entropy

Structural and dynamic properties of UO_2 at high temperatures *J R Walker and C R A Catlow* CL979

65.70 Thermal expansion and thermomechanical effects

Thermal expansion of $KTaO_3$ at low temperatures *G K White* CL297

The characterisation of VSe_2: A study of the thermal expansion *G A Wiegers* C4225

66.00 TRANSPORT PROPERTIES OF CONDENSED MATTER (NON-ELECTRONIC)

66.30 Diffusion in solids

Energy and particle number self-diffusion of a classical particle in the potential of randomly fixed scatterers *M Lücke* CL113

The activation energy for clustering of Ca^{2+}–vacancy pairs in NaCl and a comparison with the diffusion activation energy *J S Cook and J S Dryden* C1133

Diffusion correlation factors and atomic displacements for the vacancy mechanism *C A Sholl* C2723

NMR study of diffusion in Li_3N *R Messer, H Birli and K Differt* C2731

Concerning the low-temperature electrical conductivity of silver chloride containing cadmium *G M Fryer* CL815

A mathematical analysis of diffusion in dislocations: I. Application to concentration 'tails' *A D LeClaire and A Ravinovitch* C3863

Some features of self-diffusion in SnTe *D Shaw* CL869

Migration of V_k centres in CsI crystal *M Barland, E Duval and A Nouailhat* C4237

Phenomenological coefficients for matter transport by vacancies from linear response theory: I. Derivation of Manning's equations for the impurity correlation factor *A R Allnatt* C5453

Phenomenological coefficients for matter transport by vacancies from linear response theory: II. Completion of the five-frequency model *A R Allnatt* C5467

66.70 Non-electronic thermal conduction and heat-pulse propagation in non-metallic solids

The importance of static strains in studies of thermal phonon scattering by strongly coupled impurities *J L Patel, J K Wigmore and J R Fletcher* C1271

The thermal conductivity and specific heat of epoxy-resin from 0.1–80K *S Kelham and H M Rosenberg* C1737

Magnetic dipole scattering of phonons and the thermal conductivity of $GdCl_3$ *G S Dixon* C2147

The diffuse flow of high-frequency thermal waves in dielectrics *I F I Mikhail* C1997

Thermal conductivity of ^3He and ^4He crystals containing neon impurities *R Berman and D M Livesley* CL945

67.00 QUANTUM FLUIDS AND SOLIDS; LIQUID AND SOLID HELIUM

67.40 Boson degeneracy and superfluidity of helium-4

The velocity spectrum of rotons emitted by negative ions in superfluid ^4He *R M Bowley* C1225

Temperature-dependent vortex nucleation in isotopically pure superfluid ^4He *G G Nancolas, P V E McClintock, F E Moss and R M Bowley* CL681

Calculation of the mutual friction parameters in liquid helium II and the nature of the vortex core *A J Hillel* C4027

67.50 Fermi fluids; liquid helium-3

Hydrodynamics of ^3He-A in high magnetic fields *H Brand and H Pleiner* C97

Phenomenological theory of the squashing mode in the BW phase of superfluid ^3He *M S Wartak* CL155

Energy and hydrodynamics of superfluid ^3He *R Combescot* C1619

Strong-coupling corrections to the shear viscosity of superfluid ^3He-B *Y A Ono and J Hara* C2093

'Luttinger liquid theory' of one-dimensional quantum fluids: I. Properties of the Luttinger model and their extension to the general 1D interacting spinless Fermi gas *F D M Haldane* C2585

Microscopic theory for ^3He B hydrodynamics *R Combescot* C4765

Quasiclassical theory of ions in ^3He *B V Thunebreg, J Kurkijärvi and D Rainer* C5615

67.80 Solid helium and related quantum crystals

Thermal conductivity of ^3He and ^4He crystals containing neon impurities *R Berman and D M Livesley* CL945

68.00 SURFACES AND INTERFACES; THIN FILMS AND WHISKERS

68.10 Fluid surfaces and fluid–fluid interfaces

Interfacial colloidal crystals and melting transition *R K Kalia and P Vashishta* CL643

68.20 Solid surface structure

The 2 × 1 reconstruction of the Ge{001} surface *J C Fernandez, W S Yang, H D Shih, F Jona, D W Jepsen and P M Marcus* CL55

68.25 Mechanical and acoustic properties of solid surfaces and interfaces

A theory of surface instabilities produced by the crystal size effect *P Masri* CL385

Interface phonons: effects of crystal size *P Masri* C2265

68.30 Dynamics of solid surfaces and interface vibrations

The vibration spectrum of hydrogen bound by molybdenum sulphide catalysts *C M Sayers* C4969

Observation of surface optical phonons on $SrTiO_3$(100) *A D Baden, P A Cox, R G Egdell, A F Orchard and R J D Willmer* CL1081

68.40 Surface energy of solids; thermodynamic properties

Changes in the surface energy of solids caused by light absorption *L L Konstantinov, V P Hinkov and J I Burov* C1799

68.45 Solid–fluid interface processes

Intermediate-coupling approach in the induced covalent bond theory of chemisorption *S Sawada* C1693

A theoretical study of angle-resolved photoemission from adsorbates: bromine on (100) face of copper *N Kar* C2185

Matrix controlled equilibrium between the various H sites in annealed sputtered a-Si:H *A Deneuville, J C Bruyère, A Mini, H Kahil, R Danielou and E Ligeon* C2279

Energy of interaction between two atoms chemisorbed at FCC and BCC transition metal surfaces *J Lopez, J C Le Bosse and J Rousseau-Violet* CL493

Study of the W(Ta) core level shifts induced by the adsorption of oxygen on tungsten (tantalum) (110) *G Tréglia, M C Desjonquères, D Spanjaard, Y Lassailly, C Guillot, Y Jugnet, Tran Minh Duc and J Lecante* C3463

Oxidation of the Zn(0001) surface *T C Gainey and B J Hopkins* C5763

68.55 Thin film growth, structure and epitaxy

Synchrotron x-ray study of monolayer krypton melting *R J Birgeneau, G S Brown, P M Horn, D E Moncton and P W Stephens* CL49

68.90 Other topics in the structure and non-electronic properties of surfaces and thin films

Existence of a surface-induced pressure in anisotropic crystals *M Rappaz and A Châtelain* C4515

A reversible phase transition in carbon segregation to W(110) *S D Foulias, K J Rawlings and B J Hopkins* C5403

A model for carburised W(100) and W(110) *K J Rawlings, S D Foulias and B J Hopkins* C5411

70.00 CONDENSED MATTER: ELECTRONIC STRUCTURE, ELECTRICAL, MAGNETIC AND OPTICAL PROPERTIES

71.00 ELECTRON STATES

71.10 General theories and computational techniques

Theory of topologically disordered systems: I. Random cell model *J Golka and G Mahler* C21

Analytic solution by the recursion method of the Anderson model for strong disorder *R Haydock* C229

A generalised Friedel sum rule *J B Pendry* C1137

On the spectrum of spatially disordered systems *P V Elyutin* C1435

Theory of topologically disordered systems: II. Impurity bands in a donor-pair approximation *J Golka and G Mahler* C1445

Essential singularities and Wegner's inequality $\gamma \leqslant 1$ for the averaged Green function of an electron in a random potential *R Rosman* CL301

Use of symmetry in non-muffin-tin multiple scattering theory *V C Rakhecha and N S Satya Murthy* C1809

Extended and localised electron states in a one-dimensional system with bond distortion *B R Bulka* CL725

Eigenstates of an electron in ordered and disordered ensembles of scatterers: II State vectors *H-J Unger* C3711

Eigenstates of an electron in ordered and disordered ensembles of scatterers: III. Application to systems of δ-potentials in one dimension *H-J Unger* C3727

Determination of universality classes for spin-dependent ensembles with time-reversal invariance *R Oppermann and K Jüngling* C3745

Critical localisation behaviour of spin-dependent ensembles with broken time-reversal invariance *R Oppermann* C3757

A method of embedding *J E Inglesfield* C3795

A variational treatment of electron states in lattices with diagonal disorder *J P Hernandez* CL985

Green function solution for two hybridised electron bands *E V Anda* CL1037

71.20 Electronic density of states determinations

A generalisation of the locator coherent-potential approximation for alloys with short-range order *J Rössler and E Lazo* C3499

Electronic density of states of a stereo-irregular polyethylene *M Kertész and G Göndör* CL851

71.25 Non-localised single-particle electronic states

The electron Fermi energy of bismuth at high temperatures *I F I Mikhail and O P Hansen* CL27

The gaps of the ideal TiS_2 and $TiSe_2$ *H Isomäki and J von Boehm* CL75

Self-consistent calculation of Compton profiles, x-ray structure factors, and band structure for silicon *R Heaton and E Lafon* C347

Electron energy band shapes from angular dependent electron energy loss spectroscopy *R D Bringans* C1053

Energy bands of the cadmium halides from electron energy loss spectroscopy *R D Bringans and W Y Liang* C1065

The cellular method for graphite *C P Mallett* CL213

Electronic states in non-stoichiometric rare-earth hydrides *A Fujimori and N Tsuda* C1427

Electronic structure of NiO *A B Kunz* CL457

Pressure-induced modifications of the energy band structure of crystalline CdS *A B Kunz, R S Weidman and T C Collins* CL581

Further remarks on metastability in amorphous semiconductors *D C Licciardello* CL627

Valence band averages in silicon: Anisotropy and parabolicity *R G Humphreys* C2935

Energies and electronic energy levels of lanthanide dioxides *B M Angelov* CL757

Determination of the Fermi surface of $AuTe_2Br$ by Shubnikov–de Haas effect *B L Zhou, E Gmelin and R Villa* C4393

On the origin of the split-off conduction bands of V_2O_5 *W Lambrecht, B Djafari-Rouhani and J Vennik* C4785

Electronic structure of $(SN)_x$ and its intercalate $(SNBr_y)_x$ *A Oshiyama and H Kamimura* C5091

Transition metal silicides: aspects of the chemical bond and trends in the electronic structure *O Bisi and C Calandra* C5479

Multipulse NMR investigation of band structure in titanium hydride: proton Knight shift and spin–lattice relaxation *R Göring, R Lukas and K Bohmhammel* C5675

71.30 Metal–insulator transitions

Electron density studies of Ti_2O_3 and V_2O_3: experiment and theory *J Ashkenazi, M G Vincent, K Yvon and J M Honig* C353

A new and unique Eu-based mixed valence system: $EuPd_2Si_2$ *E V Sampathkumaran, L C Gupta, R Vijayaraghavan, K V Gopalakrishnan, R G Pillay and H G Devare* CL237

The effect of electron–electron interactions on the Peierls transition in metals with strong nesting of Fermi surfaces *P B Littlewood and V Heine* C2943

A self-energy for the intermediate valence model *J Geldenhuys, M Roberts and K W H Stevens* C4269

71.35 Excitons and related phenomena

Bound exciton recombination in beryllium-doped silicon *M O Henry, E C Lightowlers, N Killoran, D J Dunstan and B C Cavenett* CL255

Superradiance of excitons *Y C Lee and K C Liu* CL281

Theory of the self-trapped exciton bubble in rare gas solids *K S Song and C H Leung* CL359

Spatially separated electron–hole system in high magnetic fields *I V Lerner, Yu E Lozovik and D R Musin* CL311

Excitons in a semi-infinite insulator in the tight-binding approximation *G Gumbs and C Mavroyannis* C2199

Free exciton emission in forward biased ZnSe MIS diodes *X W Fan and J Woods* C1863

Theory of transmission coefficients and resonance Brillouin scattering for three-branch exciton–polaritons *G Palamidas and D R Tilley* C2951

Polaron properties of exciton complexes *S Bednarek, J Adamowski and M Suffczyński* C4405

71.36 Polaritons

Theory of ferromagnetic cavity polaritons *A Yaniv* C1633

Theory of ferromagnetic interface polaritons *A Yaniv* C2549

Theory of transmission coefficients and resonance Brillouin scattering for three-branch exciton–polaritons *G Palamidas and D R Tilley* C2951

71.38 Polarons and electron–phonon interactions

A non-perturbative approach to the bound polaron III *S Mukhopadhyay and T K Mitra* C623

Phase-transition-like behaviour in the problems of different types of polaron *H Shoji and N Tokuda* C1231

A scaling approach to locally coupled electron–phonon systems *A C Hewson* C2747

The acoustic polaron via the deformation potential under the influence of a Coulombic impurity and its phase diagram *N Tokuda, H Shoji and K Yoneya* CL637

Electron–phonon scattering in graphite intercalation compounds: a localised approach *F Guinea* C3345

Electron–phonon interaction in tetrahedrally bonded solids *J Sanchez-Dehesa, F Guinea and C Tejedor* C3355

The influence of electron–phonon coupling on the transition temperature into the SDW and CDW states *N I Kulikov and V V Tugushev* CL809
The optical polaron bound in a Coulomb potential and its phase diagram *N Tokuda, H Shoji and K Yoneya* C4281
Polaron properties of exciton complexes *S Bednarek, J Adamowski and M Suffczyński* C4405

71.45 Collective effects
Exchange and correlation potentials for finite temperature quantum calculations at intermediate degeneracies *M W C Dharma-wardana and R Taylor* C629
Dielectric anomalies in extremely non-parabolic zero-gap semiconductors *G Bastard* C839
The dynamic response of a non-uniform distribution of electrons *M W C Dharma-wardana* CL167
The dielectric function of Bi based on a two-band model *P Alstrom and H Nielsen* C1153
Dielectric tensor and plasmon–phonon modes in semiconductors with anisotropic conduction valleys *S Goettig* C1751
Magnetic delocalisation of a two-dimensional electron gas and the quantum law of electron–electron scattering *M J Uren, R A Davies, M Kaveh and M Pepper* CL395
Magnetic separation of localisation and interaction effects in a two-dimensional electron gas at low temperatures *R A Davies, M J Uren and M Pepper* CL531
The two-dimensional one-component plasma in the hypernetted chain approximation *J P Hansen and D Levesque* CL603
Electronic excitations in tight-binding systems *J Rogan and J E Inglesfield* C3585
Thermodynamics of an electron–hole plasma: study of phase transitions *S Jain and K V Dinesha* C3645
Theory of spin polarised inhomogeneous relativistic electron gas *M V Ramana and A K Rajagopal* C4291
Effect of the matrix elements on the permittivity of ZrS_2 *H M Isomäki and J von Boehm* CL1043

71.50 Localised single-particle electronic states
The localisation of electrons in a dense fluid in one dimension *D J Whitelaw and I L McLaughlin* C105
Finite size scaling approach to Anderson localisation *J L Pichard and G Sarma* CL127
Renormalisation group study of Anderson localisation in two dimensions: effect of second-order terms *K Hillebrand and R M Nieminen* CL133
Localisation and localisation edges—a precise characterisation *R Johnston* C1145
Localisation in disordered three-dimensional systems *C M Soukoulis and E N Economou* CL221
Quantum δ-dimensional Landauer formula *M Ya Azbel* CL225
Possible experimental approach to strong localisation *M Ya Azbel* CL231
A simple interpretation of the absence of quantum diffusion for one- and two-dimensional disorder *C H Hodges* CL247
Localisation in disordered two-dimensional systems and the universal dependence on diffusion length *M Kaveh, M J Uren, R A Davies and M Pepper* CL413
Localisation in 1^+-dimension *S N Pnevmatikos and E N Economou* C2611
Electronic structure of disordered intrinsic semiconductor and s–d systems: Two-band localisation *H Aoki* C2771
Finite-size scaling approach to Anderson localisation: II. Quantitative analysis and new results *J L Pichard and G Sarma* CL617
Approach to localisation in the one-dimensional Anderson model of disordered systems *K S Dy, S Y Wu and C Wongtawatnugool* CL781
New field theory formulation of localised states in disordered systems *S M Girvin, R W Rendel and G W Bryant* CL881
Electron localisation in finite quasi-one-dimensional systems *R Day and F Martino* C4247
Self-consistent theory of localisation in binary alloys *A Brezini and G Olivier* CL1049
Comments on the interplay between Anderson localisation and electron–electron interactions *J Kimball* CL1061
Exactly solvable localisation model *M Ya Azbel* C5495

71.55 Impurity and defect levels
A simple tight-binding model for deep impurity levels: application to the Jahn–Teller-distorted nitrogen donor in silicon *J A Vergés* C365
Optical lineshapes and electronic eigenstates of substitutional defects and vacancies *R E Pena and D C Mattis* C647
Deep impurities in semiconductors: II. The optical cross section *J C Inkson* C1093
Defect states dominated by localised potentials in semiconductors *S Brand, M Jaros and C O Rodriguez* C1243

A model for the interpretation of measurements of photoionisation and capture cross-sections associated with deep-level impurities *B K Ridley and M A Amato* C1255
Studies of deep chromium acceptor levels in InP *S Fung and R J Nicholas* C2135
Wavefunctions of the divacancy in silicon *E G Sieverts* C2217
Valence bond study of fluorine hyperfine interactions near trapped hydrogen atoms in the alkaline earth fluorides *A N Jette and F J Adrian* C2319
A study of the electronic wavefunction associated with isolated nitrogen impurities in GaP *P W Banks and M Jaros* C2333
Some unusual effects of fluctuations in impurity distribution in the ultra-quantum regime *S D Jog and P R Wallace* C2351
Auger linewidths for core levels in light elements embedded in metals *F Guinea and F Flores* C2965
Energy levels of cobalt in ZnSe and ZnS *J M Noras, H R Szawelska and J W Allen* C3255
Hole photoionisation cross sections for deep level impurities in silicon *L-Å Ledebo* C3279
The observation of a sharp peak in the deep-level photoconductivity spectrum of GaAs (Cr) due to the Cr^{2+} ($^5T_2$–^5E) 'intracentre' transition *L Eaves, P J Williams and Ch Uihlein* CL693
Comment on empirical photoionisation thresholds for deep-level impurities in semiconductors *J M Noras* CL713
Reply to 'Comment on empirical photoionisation thresholds' *B K Ridley* CL717
A theoretical study of defects in amorphous group-V semiconductors *E P O'Reilly and M J Kelly* C3881
The determination of the Huang–Rhys factor for a deep level in a semiconductor *M G Burt* CL845
Energy levels of silicon doped with iron *H R Szawelska and H Feichtinger* C4131
Optical properties of nickel (d^9) in GaP and ZnSe *H R Szawelska, J M Noras and J W Allen* C4141
The TR12 vibronic band in diamond *G Davies, C Foy and K O'Donnell* C4153
The deep double donor P_{Ga} in GaP *U Kaufmann, J Schneider, R Worner, T A Kennedy and N D Wilsey* CL951
Statistical mechanics of band states and impurity states in semiconductors *C-O Almbladh and G J Rees* C4575
Energy levels in ideal and reconstructed models of a silicon vacancy *M Heggie and R Jones* C4603
Electronic structure of the F centre in a sodium fluoride crystal *J J Sundquist and C C Lin* C4797
Approximate pseudopotential calculation of the Z_1 centre in alkali halides *J Adetunji and C K Ong* C5055
An energy scheme for interpreting deep-level photoconductivity and other recent optical measurement for Fe-doped InP *L Eaves, A W Smith, P J Williams, B Cockayne and W R MacEwan* C5063
Optical and capacitance spectroscopy of InP:Fe *P R Tapster, M S Skolnick, R G Humphreys, P J Dean, B Cockayne and W R MacEwan* C5069

71.70 Level splitting and interactions
Uniaxial stress measurement on the 0.97 eV line in irradiated silicon *C P Foy, M C do Carmo, G Davies and E C Lightowlers* CL7
Strain interaction effects on the high-spin–low-spin transition of transition metal compounds *S Ohnishi and S Sugano* C39
The non-compact group O(2, 1) and the Jahn–Teller effect *B R Judd* C375
Numerical investigation of the $(s + p) \otimes T_{1u}$ system: I. Vibronic eigenstates and absorption spectra *U Grevsmuhl* C665
Numerical investigation of the $(s + p) \otimes T_{1u}$ system: II. Reduction factors and emission spectra *U Grevsmuhl* C685
The role of the Jahn–Teller effect in chromium-doped GaAs *A S Abhvani, S P Austen, C A Bates, J R Fletcher, P J King and L W Parker* CL199
Optical transitions to the first vibronic state of GR1 in diamond *J E Lowther* CL375
Complex configurations in cooperative Jahn–Teller effect *P Novák* CL293
Stress-induced dichroism and Jahn–Teller active modes at the neutral vacancy in diamond *G Davies* CL391
Neutron scattering study of cooperative Jahn–Teller effects in $TmAsO_4$ *P J Becker, G A Gehring, R Ghosh and M Steiner* C1945
Pseudo Jahn–Teller effect for a doublet: effect of a tetragonal field on the cubic $E \otimes \varepsilon$ system *L F Feiner* C1955
Optical response function from impurity centres with degenerate and nearly degenerate states *S N Evangelou* C2117
The no-phonon luminescence at 0.84eV in GaAs:Cr—the Zeeman splitting *F Voillot, J Barrau, M Brousseau and J C Brabant* C1855

Neutron inelastic scattering study of the crystalline electric field and molecular field splitting in CeC_2 *W Wegener, A Furrer, W Bührer and S Hautecler* C2387

Reduction factors for a Jahn–Teller cluster model with momentum coupling *J R Fletcher* CL491

Derivation of the Hamiltonian for applied uniaxial stress: Application to paramagnetic corundum-type crystals *A S Abhvani and C A Bates* C2617

Many-body calculation of crystal-field shielding in the Pr^{3+} ion *S Ahmad* C2759

Zeeman analysis of the $^3T_1(P)$ state of Ni^{2+} ($3d^8$) in cubic ZnS *R Germer, F Seliger, U Kaufmann and J Schneider* C2535

Jahn–Teller effect of the B absorption band of Tl^+-type ions in a cubic field *S Asano and Y Nakao* C3897

Dipole interference for optical transitions of ions in crystals in a transverse Zeeman field *C DeW Van Siclen* C4611

Internal strain effects and the reduction of the number of ion–lattice interaction parameters *G E Stedman and R A Minard* C4753

The Dy^{3+} ion ground state in antiferrodistorted dysprosium potassium molybdate: $KDy(MoO_4)_2$ *M J M Leask, Z-D Luo and A C Tropper* CL1089

72.00 ELECTRONIC TRANSPORT IN CONDENSED MATTER

72.10 Theory of electronic transport; scattering mechanisms

Conductivity of the disordered linear chain *D J Thouless and S Kirkpatrick* C235

On the theory of hopping conductivity in disordered systems *B Movaghar and W Schirmacher* C859

Non-universal critical behaviour of random resistor networks with a singular distribution of conductances *A Ben-Mizrahi and D J Bergman* C909

Diffusion and logarithmic corrections to the conductivity of a disordered non-interacting 2D electron gas: power law localisation *M Kaveh and N F Mott* CL177

Electron correlations and logarithmic singularities in density of states and conductivity of disordered two-dimensional systems *M Kaveh and N F Mott* CL183

Variable-range hopping including correlation between energies and positions *M Ortuno* CL421

Percolation and conductivity of random two-dimensional composites *P H Winterfeld, L E Scriven and H T Davis* C2361

Drop model of infinite cluster for 2D percolation *A K Sarychev and A P Vinogradoff* CL487

The percolation threshold of a diminishing Cayley tree and its relation to hopping conductivity *S Summerfield and P N Butcher* CL585

A theory for many-electron hopping rates *M Pollak* C2977

The conductivity of disordered systems and the scaling theory *N F Mott and M Kaveh* CL659

Continuous time random walk along inequivalent states *M Chaturvedi and V Srivastava* CL671

An analysis and extension of the continuous time random walk method: I. Theory *V Halpern* C3195

An analysis and extension of the continuous time random walk method: II. The AC conductivity of some model disordered one-dimensional systems *V Halpern and M Sonnenschein* C3209

Series expansion for the macroscopic conductivity of a random resistor network *D J Bergman and Y Kantor* C3365

A two-bond theory of conductivity in bond-disordered resistor networks *T Nagatani* C3383

A note on the effective medium theory of random resistive–reactive medium *N Kumar and A M Jayannavar* CL785

DC conductance in a one-dimensional disordered system of finite length *D Lenstra and W van Haeringen* CL819

The conductivity of strongly disordered two-dimensional systems *A Gold and W Götze* C4049

A percolation treatment of the conductivity for the high-temperature small-polaron hopping regime in disordered systems *G P Triberis and L R Friedman* C4631

On the effective medium theory of random linear networks *J Koplik* C4821

Multi-bond expansions for the effective conductivity in bond-disordered resistor networks *T Nagatani* C4839

On the problem of DC conductivity at $T = 0$K in a one-dimensional system of finite length: calculation of the scattering rate in case of weak disorder *D Lenstra and W van Haeringen* C5293

A simple extension of the pair approximation to AC hopping conductivity in disordered systems to embrace the DC limit *P N Butcher and S Summerfield* CL1099

72.15 Electronic conduction in metals and alloys

Thermodynamics of electron–ion liquids and their response to external fields and thermal gradients *W Jones* C5505

72.15N Collective modes; e.g. in one-dimensional conductors

Interchain coupling in linear conductors *A M Finkel'stein and S A Brazovsky* C847

Charge density waves in a strong magnetic field *B G S Doman* C1457

Effect of the Kohn anomaly on one-dimensional conduction *M Kaveh* CL465

Room temperature reflectivity and thermoreflectance spectra of 1T VSe_2 *A Gustinetti and G Campagnoli* CL609

Effect of electron irradiation on the non-linear properties of $NbSe_3$ *P Monceau, J Richard and R Lagnier* C2995

Charge-density waves in a strong magnetic field: II *B G S Doman* C3393

The influence of electron–phonon coupling on the transition temperature into the SDW and CDW states *N I Kulikov and V V Tugushev* CL809

Calculations of the 3 × 3 charge density wave state in a 2H layer compound *N J Doran and A M Woolley* C4257

Transport properties of VSe_2 intercalated with hydrazine *M Sarma, A Ghorayeb, S Nulsen and R H Friend* CL1055

72.20 Conductivity phenomena in semiconductors and insulators

Transport properties of CeSb *M Escorne, A Mauger, D Ravot and J C Achard* C1821

Temperature-dependent dispersive transport in a-As_2Se_3 *A C Sharp and J M Marshall* CL761

Stoichiometry dependence of the transport properties of TiS_2 *P C Klipstein, A G Bagnall, W Y Liang, E A Marseglia and R H Friend* C4067

Low-temperature radiation damage studies in silicon by hopping conductance *S D Kouimtzi and P C Banbury* C3701

The conductivity and Seebeck coefficient in the nearest-neighbour hopping regime of a Fermi glass *T E Whall* CL887

72.20D General theory, scattering mechanisms

Diffusion of electrons and holes in semiconductors under conditions of gradients of lattice temperature and carrier concentration *M Wautelet* C891

Diffusion size effect calculation for n-Si *J E Aubrey* C1103

New mechanisms for the electrical resistivity of layer compounds: TiS_2 *M Kaveh, M F Cherry and M Weger* CL789

Application of the Kohn variational principle to a particle of effective mass m^* *K R Brownstein* CL855

Electric carriers and heat in semiconductors at high electronic temperature *M Wautelet* C4303

Pressure enhancement of the electrical conductivity of graphite intercalation compounds *C Uher* CL911

Transport properties of conducting and semiconducting anisotropic mixtures *J P Troadec, D Bideau and E Guyon* C4807

Theory of electrical resistivity in an interacting two-carrier system: application to $(SN)_x$ and $(SNBr_y)_x$ *A Oshiyama* C5109

Hot electrons in non-polar liquids *V M Atrazhev and I T Iakubov* C5139

Energy-loss mechanisms of hot electrons in n-In-Sb *K Shimomae, Y Hirose and C Hamaguchi* C5151

72.20H High-field and non-linear effects

Hole transport in vapour-deposited As_2S_3 *M Burman, J Hirsch and T Ramdeen* C117

Effects of the propagation of ultrasound on linear longitudinal conductivity in degenerate semiconductors *C C Wu and J Tsai* C3005

72.20J Charge carriers; generation, recombination, lifetime, and trapping

Very low temperature TSC trap spectroscopy *J Bonnafe, M Castagne, J Romestan and J P Fillard* C2465

Calculation of the zero-temperature Auger recombination rate in the quaternary semiconductor alloy GaAlAsSb *M G Burt* C3269

Semiclassical theory of non-radiative transitions *T Markvart* CL895

72.20M Galvanomagnetic and other magnetotransport effects

Electron transport in direct-gap III–V ternary alloys *D Chattopadhyay, S K Sutradhar and B R Nag* C891

Magnetoresistance measurements in n-type CdS single crystals annealed in molten Cd and In *B R Sethi, O P Sharma, P K Goyal and P C Mathur* C1649

Hall effect measurements on ZnO accumulation layers *E Veuhoff and D Kohl* C2395

Electrical resistivity and Hall effect in the mixed system $Ti_{1-x}Hf_xSe_2$ *I Taguchi* C3221

Localisation and the two-dimensional Hall effect *D J Thouless* C3475

The sign anomaly of the Hall effect in amorphous tetrahedrally bonded semiconductors: a chemical-bond orbital approach *M Grünewald, P Thomas and D Würtz* C4083

Galvanomagnetic measurements in Fe_3O_4 *I Shiozaki, C M Hurd, S P McAlister, W R McKinnon and P Strobel* C4641

The Hall mobility in hopping conduction *B Movaghar, B Pohlmann and D Wurtz* C5127

Velocity operator and strong-field Hall effect for non-parabolic bands of the type $\varepsilon(1 + \varepsilon/\varepsilon_G)$ *O P Hansen* C5501

Temperature study of interband magnetoabsorption in $Hg_{1-x}Mn_xTe$ mixed crystals *M Dobrowolska and W Dobrowolski* C5689

Temperature variation of the thermopower of a graphite–$FeCl_3$ intercalation compound *J-P Issi, J Boxus, B Poulaert, H Mazurek and M S Dresselhaus* CL307

Thermoelectric power studies of $Ag_7I_4AsO_4$ superionic conductor *M N Avasthi, M Saleem and M T El-Gemal* C3521

72.40 Photoconduction and photovoltaic effects; photodielectric effects

The observation of a sharp peak in the deep-level photoconductivity spectrum of GaAs (Cr) due to the Cr^{2+} ($^5T_2$ – ^5E) 'intracentre' transition *L Eaves, P J Williams and Ch Uihlein* CL693

Pulsed photoconductivity in linear and quadratic recombination regimes *A S Siddiqui* CL699

An energy scheme for interpreting deep-level photoconductivity and other recent optical measurement for Fe-doped InP *L Eaves, A W Smith, P J Williams, B Cockayne and W R MacEwan* C5063

72.60 Mixed conductivity and conductivity transitions

A new approach to electronic transitions in the samarium monochalcogenides *R Narayan and S Ramaseshan* C211

On the conductivity of magnetite below the Verwey transition *W R McKinnon, C M Hurd and I Shiozaki* CL877

72.70 Noise processes and phenomena

The examination of correlated noise *R M Hill, L A Dissado and R Jackson* C3915

73.00 ELECTRONIC STRUCTURE AND ELECTRICAL PROPERTIES OF SURFACES, INTERFACES AND THIN FILMS

73.20 Electronic surface states

Surface relaxation effects on the electronic structure of (111) and $(\bar{1}\bar{1}\bar{1})$ surfaces of GaP, GaAs, and GaSb *M Nishida* C535

Electronic structure of buckled and vacancy models of Si(111)–7 × 7 surface by DV–Xα cluster method *K Nakamura, T Hoshino, M Tsukada, S Ohnishi and S Sugano* C2165

The mobility of bonds at metal surfaces *R Haydock* C3807

Image-induced surface states on electronically dense metals *G Barton* C3975

Electron states at Cu surfaces *D W Bullett* C4521

On the oscillatory behaviour of velocity autocorrelation function of a 2D electron liquid *R K Kalia, P Vashishta, S W de Leeuw and A Rahman* CL991

Image-induced surface states on metals: the effects of spatial dispersion *G Barton and M Babiker* C4951

Theoretical studies of underlayer chemisorption I: electronic structure of Ti_6 and Ti_6N clusters *K Shinjo, S Ohnishi, M Tsukada and S Sugano* C5575

Outer core spectra of Cs and Rb on Mg surfaces *J E Cunningham, D Gibbs, T H Chiu and C P Flynn* CL1113

Response of simple metals to surface core excitations *D Gibbs, J E Cunningham, T H Chiu and C P Flynn* CL1119

73.25 Surface conductivity

Temperature dependent metallic conductance above the mobility edge of a silicon inversion layer *H H J M Niederer, A P M Matthey and M J Sparnaay* C4167

Thermally activated conductance of a silicon inversion layer by electrons excited above the mobility edge *H H J M Niederer, A P M Matthey and M J Sparnaay* C4177

73.30 Surface double layers, Schottky barriers, and workfunctions

The predominance of a surface plane of high work function on Ti films *K Kandasamy and N A Surplice* CL61

Tunnelling in metal–silicon Schottky barriers and effects of radiation compensation *J T Wimmers and J E Christopher* C977

The influence of adsorbed layers in controlling Schottky barriers *V Montgomery, R H Willams and G P Srivastava* CL191

Theory of trap filling in Schottky diodes *J M Noras* C2341

73.40 Interfaces

Hall measurements on MOSFET devices prepared by TCE oxidation *D Kohl, C Becker, G Heiland, U Niggerbrugge and P Balk* C553

Electronic properties of the annealed interface between Ag and 7 × 7 Si(111) *D Bolmont, P Chen and C A Sebenne* C3313

Localisation and the two-dimensional Hall effect *D J Thouless* C3475

The observation of localisation and interaction effects in the two-dimensional electron gas of a GaAs–GaAlAs heterojunction at low temperatures *D A Poole, M Pepper and R Glew* CL995

Theoretical study of metal overlayer thickness effects on the electronic properties of metal–semiconductor interfaces *P Masri and P Langlade* C5379

Logarithmic corrections to two-dimensional transport in silicon inversion layers *M J Uren, R A Davies, M Kaveh and M Pepper* C5737

73.60 Electronic properties of thin films

Spin polarised ultra-thin metallic films *J Noffke and L Fritsche* C89

Photoluminescence studies of band-bending in hydrogenated amorphous silicon thin films *D J Dunstan* C1363

Electronic structure of Ag two-dimensional layers on Si(111): an electron spectroscopy investigation *G Dufour, J-M Mariot, A Masson and H Roulet* C2539

73.90 Other topics in electrical properties of surfaces, interfaces and thin films

Enhanced light scattering by adsorbates—effects of surface plasmon dispersion relation *M Babiker* C1351

Piezoelectric scattering in quantised surface layers in semiconductors *P K Basu and B R Nag* C1519

Effect of impurities on the two-dimensional electron gas polarisability *J S Nkoma* C1685

Hall effect measurements on ZnO accumulation layers *E Veuhoff and D Kohl* C2395

The energy-loss spectra of fast charged particles passing through a thin metallic film *C C Sung and R H Ritchie* C2409

Slowly varying time-dependent local perturbations in metals: a new approach *R Brako and D M Newns* C3065

Electronic damping of a vibrating dipole near a metal *B N J Persson and W L Schaich* C5583

74.00 SUPERCONDUCTIVITY

On phase diagram of granular superconductor *Yu E Lozovik and S G Akopov* CL31

Three new superconducting members of the family of tetramethyltetraselenafulvalene (TMTSF) salts *S S P Parkin, M Ribault, D Jerome and K Bechgaard* CL445

Quasilocal structural excitations in the lattice of high-T_c superconductors *G M Vujičić, V I Aksenov, N M Plakida and S Stamenković* C2377

Superconductivity in the family of organic salts based on the tetramethyltetraselenafulvalene (TMTSF) molecule: $(TMTSF)_2X$ ($X = ClO_4, PF_6, AsF_6, SbF_6, TaF_6$) *S S P Parkin, M Ribault, D Jérome and K Bechgaard* C5305

75.00 MAGNETIC PROPERTIES AND MATERIALS

75.10 General theory and models of magnetic ordering

Time-dependent correlations of the one-dimensional isotropic *XY* model *H B Cruz and L L Gonçalves* C2785

Fourier transforms of dipole–dipole interactions using Ewald's method *G J Bowden and R G Clark* CL827

The pseudoquadrupole effect in cubic ferromagnets *G A Gehring and A B Walker* C5523

75.10D Crystal-field theory and spin-Hamiltonians

Computation of spin Hamiltonian parameters for $3d^n$ ions at arbitrary symmetry within the lowest *LS* term approximation *C Rudowicz* C923

Crystal field effects on the magnetic susceptibility of mixed valence systems *J C Mohanty, P K Misra and S O Mahanti* CL1125

75.10H Ising and other classical spin models

Correlation reduction theory for Ising model with spin 1/2 *Hwe Ik Zhang* C57

Infinitely many phases in a large class of Ising models *W Selke* CL17

The spin *S* Ising model with a transverse field *J Oitmaa and G J Coombs* C143

Absence of spin glass order in the 2D site-diluted triangular antiferromagnet *J A Blackman, G Kemeny and J P Straley* C385

Correlation between frustrated plaquettes in the random bond square lattice *R Liebmann and H G Schuster* C709

Surface tension of the dilute Ising model at $T = 0$ *M J de Oliveira* CL317

A computer simulation of the dilute Ising ferromagnet *T Takahashi and M Shimizu* C1657

Percolation with long-range interactions *M J Stephen and A Aharony* C1665

The ground state of an impure FCC Ising antiferromagnet *B G S Doman* C1765

Correlation reduction theory for Ising model: II. Generalisation to arbitrary spin *Hwe Ik Zhang and Byung Il Min* C1769

Correlation reduction theory for Ising model: III. Application to anisotropic lattices *Byung Il Min and Hwe Ik Zhang* C1779

Diluted quantum transverse Ising model *R B Stinchcombe* CL263

The random field Ising model in one and two dimensions *K De'Bell* CL269

On the ferromagnetic phase breakdown of a two-dimensional Ising model with competing interactions *J R L de Almeida, I P Fittipaldi and F C Sá Barreto* CL403

Exact scalings of pure and dilute quantum transverse Ising chains *R B Stinchcombe* C2193

On correlation functions in random magnets *B Derrida and H Hilhorst* CL539

Critical behaviour of Ising magnets: infinitesimal Migdal–Kadanoff approximation *O Nagai and M Toyonaga* CL545

Ising spin gauge theory at upper marginal dimensionality for spin glasses *G Aeppli and G Bhanot* CL593

Metastable states and innocent replica theory in an Ising spin glass *S A Roberts* C3015

Quantum versus classical domain walls in the Ising chain with a transverse field *P Prelovšek and I Sega* C3231

Probability density functions for collective coordinates in Ising-like systems *A D Bruce* C3667

Fluctuation effect and the spin-glass transition temperatures in the random-bond Ising models in the hexagonal, triangular, BCC and other lattices—unified description *I Nagahara, S Fujiki and S Katsura* C3781

Low-temperature series expansions for the FCC Ising antiferromagnet *N D Mackenzie and A P Young* C3927

Ground state properties of frustrated Ising chains *J K Williams* C4095

Critical temperatures for models with random distribution of Ising and Heisenberg-like spins *A Komoda and A Pękalski* CL1067

Self-dual cluster renormalisation-group approach for the square lattice Ising model: specific heat and magnetisation *H O Mártin and C Tsallis* C5645

75.10J Heisenberg and other quantised localised spin models

Pure and diluted anisotropic quantum Heisenberg model *R B Stinchcombe* C397

Quasiparticle model of deviations in the spin-flop phase of a one-dimensional spin $\frac{1}{2}$ Heisenberg antiferromagnet *H Aghahosseini and J B Parkinson* C425

On solitons in semiclassical limit of the quantum spin-$\frac{1}{2}$ Heisenberg chain *A Popielewicz* CL325

Easy-axis antiferromagnets with intermediate anisotropy *G F Tuthill* C2483

Low-temperature phonon dynamics of a classical compressible Heisenberg chain *J Fivez, B De Raedt and H De Raedt* C2923

On the long-range random Heisenberg ferromagnet *S S Makler, M A Continentino and E V Anda* C3027

A numerical study of the RPA spin waves of the Mattis–Heisenberg model *R Johnston* C3033

Quantum spin dynamics of the one-dimensional planar antiferromagnet *G Müller, H Thomas, M W Puga and H Beck* C3399

Failure of renormalisation group method in semiclassical limit *D C Mattis and R Schilling* CL729

Tricritical point in systems with randomly oriented local fields *V K Saxena* CL745

Absence of long-range order in systems with random *p*-fold anisotropies *A Aharony* CL841

CPA approach for randomly diluted anisotropic ferromagnets: para-spin-flop critical field *F G Brady Moreira, I P Fittipaldi and R B Stinchcombe* C4415

Static correlations in one-dimensional easy-axis magnets *M Cieplak and A Kryszeń* C4849

Dynamical correlations in one-dimensional easy-plane magnets *M Cieplak and A Sjölander* C4861

Critical temperatures for models with random distribution of Ising and Heisenberg-like spins *A Komoda and A Pękalski* CL1067

75.10L Band and itinerant models

Real-space renormalisation-group study of the one-dimensional Hubbard model *C Dasgupta and P Pfeuty* C717

Itinerant magnetism in hybridised degenerate electronic bands *J Spalek and D K Ray* CL159

Strong itinerant magnetism in ternary boride $CeRh_3B_2$ *S K Dhar, S K Malik and R Vijayaraghavan* CL321

A theory of magneto-volume effects of itinerant-electron magnets: I Spontaneous volume magnetostriction *H Hasagawa* C2793

Spin glasses

Spin glass dynamics in the spherical model *P Shukla and S Singh* CL81

Metastable states in spin glasses with short-ranged interactions *A J Bray and M A Moore* C1313

Random-temperature Ginzburg–Landau model: relation to conventional spin glass models *D Sherrington* CL371

Spin glasses with various ranges of interaction at low temperatures *Y Proykova and N Rivier* C1839

Behaviour of a model spin glass in strong magnetic fields *H G E Hentschel* C2473

Metastable states, internal field distributions and magnetic excitations in spin glasses *A J Bray and M A Moore* C2629

Monte Carlo studies of $\pm J$ spin glasses with continuous symmetries in $D = 2$ *C Kawabata, J V José and S Kirkpatrick* CL633

Metastable states and innocent replica theory in an Ising spin glass *S A Roberts* C3015

Spin glass as a percolation problem *R E Nettleton and M J Stephen* CL707

Fluctuations of magnetic moment in spin glass *P Rusek* C3769

Fluctuation effect and the spin-glass transition temperatures in the random-bond Ising models in the hexagonal, triangular, BCC and other lattices—unified description *I Nagahara, S Fujiki and S Katsura* C3781

2D random-axes XY magnet *V S Dotsenko and M V Feigelman* CL823

The TAP equations revisited: a qualitative picture of the SK spin glass model *A P Young* CL1085

75.20 Diamagnetism and paramagnetism

The paramagnetic state of BCC iron *B S Shastry, D M Edwards and A P Young* CL665

75.20H Local moments in dilute alloys; Kondo effect

Exact solution of the s–d exchange model (Kondo problem) *P B Weigmann* C1463

A quasi-Kondo effect in $Pb_{1-x}Ge_xTe$ alloys *H Yaraneri, A D C Grassie, He Yusheng and J W Loram* CL441

On the completeness of Wiegmann's solution to the Kondo problem *C C Lai and W Yong-Shi* CL915

75.25 Spin arrangements in magnetically ordered materials (neutron studies; etc.)

Neutron diffraction study of long-range antiferromagnetic order and crystal structure of uranium (III) tri-iodide *A Murasik, P Fischer and W Szczepaniak* C1847

Neutron scattering investigation of the mixed magnetic system $Fe_{1-x}Mn_xCl_2$ *D Bertrand, D Petitgrand, B Hennion and S Legrand* C1975

Observation of hyperfine-enhanced nuclear polarisation in CoF_2 by means of neutron diffraction *M Steiner, L Bevaart, Y Ajiro, A J Millhouse, K Ohlhoff, G Rahn, H Dachs, U Scheer and B Wanklyn* CL597

Neutron diffraction study of the incommensurate magnetic phase of $Ni_{0.92}Zn_{0.08}Br_2$ *P Day, M W Moore, C Wilkinson and K R A Ziebeck* C3423

A neutron polarisation analysis study of the 'central' peak in single-crystal praseodymium *S K Burke, W G Stirling and K A McEwen* CL967

A neutron diffraction study of weak ferromagnetism in nickel fluoride *P J Brown and J B Forsyth* C5173

75.30 Magnetically ordered materials, other intrinsic properties

75.30C Saturation moments and magnetic susceptibility

Crystal field effects on the magnetic susceptibility of mixed valence systems *J C Mohanty, P K Misra and S D Mahanti* CL1125

75.30D Spin waves

Non-covariant corrections to magnetic solitons in $CsNiF_3$ *P S Riseborough, D L Mills and S E Trullinger* C1109

Surface nuclear spin waves in a semi-infinite ferromagnetic insulator *E F Sarmento and M G Cottam* C2559

Theory of one-magnon light scattering in three-sublattice ferrimagnets *A F Khater and R B Guimarães* C2665

A numerical study of the RPA spin waves of the Mattis–Heisenberg model *R Johnston* C3033

The influence of the anisotropy on the temperature renormalisation of the magnetic excitations in $FeCl_2$ *M G Pini, E Rastelli, A Tassi and V Tognetti* C3041

Solitary waves in an anisotropic one-dimensional antiferromagnet with magnetoelastic coupling *R P Hodgson and J B Parkinson* C3935

Light scattering by magnons in cadmium manganese telluride alloys *M Grynberg and M Picquart* C4677

Neutron scattering investigation of the temperature dependence of long-wavelength spin waves in ferromagnetic Rb_2CrCl_4 *M T Hutchings, J Als-Nielsen, P A Lindgard and P J Walker* C5327

Theory of elementary excitations in ferromagnetic semiconductors *A Babcenco and M G Cottam* C5347

75.30E Exchange and superexchange interactions

Kinetic exchange at low charge transfer energies *M V Eremin and Yu V Rakitin* C247

The theory of coupled Cr^{3+} pairs of D_{3h} symmetry *K R Barry, K J Maxwell, K A Siddiqui and K W H Stevens* C1281

Pair spectra studies of Cr^{3+} ions in the $(^4A_2 \times {}^2T_1)$ excited states of $Cs_3Cr_2Cl_9$ *I W Johnstone, K J Maxwell and K W H Stevens* C1297

Exact equivalence of the Dzialoshinski–Moriya exchange interaction and quadratic spin anisotropies *M Calvo* CL733

75.30G Anisotropy

A model for unusual magnetic anisotropy of Ce pnictides *K Takegahara, H Takahashi, A Yanase and T Kasuya* C737

75.40 Critical-point effects, specific heats, short-range order

Commensurate turn angle effects in single-crystal antiferromagnetic dysprosium *R D Greenough, G N Blackie and S B Palmer* C9

Magnetic ordering in praseodymium at millikelvin temperatures *K A McEwen and W G Stirling* C157

Phase transitions in a spin-1 system with the three-atom interaction *J Aksamit and B Westwanski* C255

Conjecture on the critical frontier of the fully anisotropic homogeneous quenched bond-mixed Potts ferromagnet in square lattice *C Tsallis* CL85

A new method of analysing critical behaviour of high-temperature series in a finite field *K J Chang and K C Lee* C935

Pressure dependence of the incommensurate magnetic phase of $NiBr_2$ and $Ni_{0.92}Zn_{0.08}Br_2$ *P Day and C Vettier* CL195

Thermomagnetic study of the antiferromagnetic solid solutions pMnO–qCoO *J Kleinclauss, R Mainhard, H Fousse, N Ciret, D Bour and A J Pointon* C1163

Néel temperatures of dilute $Fe_{1-x}Cd_xCl_2$ and mixed $Fe_{1-x}Mn_xCl_2$ by susceptibility measurements *D Bertrand, A R Fert, S Legrand, J P Redoulès and M C Schmidt* C1789

Low-temperature magnetic viscosity in the re-entrant ferromagnet $(Fe_{0.68}Mn_{0.32})_{75}P_{16}B_6A_3$ *Y Yeshurun and M B Salamon* CL575

Optical and neutron diffraction study of the magnetic phase diagrams of the mixed metamagnets $Fe_{1-p}Mn_pCl_2$ *S K Haywood, T E Wood and P Day* C2697

Dynamic scaling near the ferromagnetic phase transition of YIG *L A Dissado and R M Hill* CL649

Cell-preserving magnetic phase transitions: the transitions in perovskite-type crystals and in beta uranium hydride *A K Agyei* C3433

Measurement of the critical exponent β by means of optical birefringence on the Heisenberg antiferromagnet $RbMnF_3$ *A S Stefanescu and P-J Becker* CL737

A new multicritical point in anisotropic magnets: II. Ferromagnet in a random skew field *S Galam and A Aharony* C3603

Magnetic phase transition of second-stage $NiCl_2$–graphite intercalation compound in an external magnetic field *M Suzuki and H Ikeda* CL923

Wavevector and spin reorientation in MnSi *M L Plumer and M B Walker* C4689

Critical neutron scattering in CeSb *B Hälg, A Furrer, W Hälg and O Vogt* CL961

Critical ^{19}F NMR line broadening in the randomly dilute Ising antiferromagnet $Mn_{1-x}Zn_xF_2$ *R A Dunlap and A M Gottlieb* CL1007

Critical phenomena in anti-parallel aligning ferrimagnets *R G Bowers* CL1013

The transition temperature of Cu nuclei to an ordered state *K J Niskanen and J Kurkijärvi* C5517

75.50 Studies of specific magnetic materials

The antiferromagnetic structure of $DyMn_2O_5$ at 4.2K *C Wilkinson, F Sinclair, P Gardner, J B Forsyth and B M R Wanklyn* C1671

Variation of the sublattice magnetisation in antiferromagnetic $GdVO_4$ with temperature from the NMR of ^{51}V, $I = 7/2$ *B Bleaney, A C de Oliveira and M R Wells* CL505

Raman scattering study of spin dynamics in the quasi-1D Ising antiferromagnets $CsCoCl_3$ and $CsCoBr_3$ *W P Lehmann, W Breitling and R Weber* C4655

A neutron diffraction study of weak ferromagnetism in nickel fluoride *P J Brown and J B Forsyth* C5171

Neutron scattering investigation of the temperature dependence of long-wavelength spin waves in ferromagnetic Rb_2CrCl_4 *M T Hutchings, J Als-Nielsen, P A Lindgard and P J Walker* C5327

Theory of elementary excitations in ferromagnetic semiconductors *A Babcenco and M G Cottam* C5347

75.80 Magnetomechanical and magnetoelectric effects, magnetostriction

Longitudinal magnetostriction of bismuth above the last quantum limit *J P Michenaud, J Heremans, J Boxus and C Haumont* CL13

A theory of magneto-volume effects of itinerant-electron magnets: I. Spontaneous volume magnetostriction *H Hasegawa* C2793

Structural relaxation in ferromagnetic glasses *M A Continentino* C3527

Magnetostriction and deformation potentials in graphite *J Heremans, J-P Michenaud, M Shayegan and G Dresselhaus* C3541

Magnetoelastic interaction in rare-earth systems: I. Crystal-field levels *I F Ginzburg and S P L Panfil* C4311

Magnetoelastic interaction in rare-earth systems: II. Specific heat, thermal expansion and elastic constants *I F Ginzburg and S P L Panfil* C4319

76.00 MAGNETIC RESONANCES AND RELAXATION IN CONDENSED MATTER; MÖSSBAUER EFFECT

76.30 Electron spin resonance and relaxation

Ligand displacement contributions to hyperfine interactions *H S Murrieta, G S Aguilar and J O Rubio* CL331

76.30D Ions and impurities: general

Energy transfer via disturbed host species in a mixed organic crystal system *Ö Pekcan* C745

Excitation probabilities and intermolecular interaction of host and guest molecules of a paired centre in a mixed organic crystal system *Ö Pekcan* C3957

The deep double donor P_{Ga} in GaP *U Kaufmann, J Schneider, R Worner, T A Kennedy and N D Wilsey* CL951

Electron spin resonance imaging of paramagnetic centres in solids *M J R Hoch* C5659

76.30F Iron group ions and impurities

EPR study of aggregation of Mn^{2+}–Na^{+} vacancy dipoles and precipitation of Mn^{2+} in single crystals of orthorhombic NaNO$_2$ *A K Jain and G C Upreti* C439

New EPR data for chromium in electron-irradiated p-type GaAs: the observation of Cr complexes *J E Whitehouse, N K Goswami and R C Newman* CL139

Experimental investigation of the spin packet width near a cross-relaxation resonance *R Boscaino, C Cusumano and F M Gelardi* CL275

A study of Cr^{4+}: Al$_2$O$_3$ by direct resonant and non-resonant cross relaxation *C A Bates, A Vasson and A-M Vasson* C2809

Applications of resonant cross-relaxation studies in thermally detected EPR *C A Bates, M Rezki, A Vasson, A-M Vasson and A Gavaix* C2823

Photo-EPR and ODMR investigations of radioactive processes in ZnS:Cr,Sc *M Godlewski, Z Wilamowski, M Kamińska, W E Lamb and B C Cavenett* C2835

EPR spectra of Cr^{3+} centres in crystals of Cs$_2$CdCl$_4$ *D Kay and G L McPherson* C3247

Electron paramagnetic resonance of InP:Co *J M Baker, L J C Bluck, B Cockayne and W R MacEwen* C3953

Influence of temperature and iron concentration on the ESR spectrum of tetragonal and orthorhombic Fe^{3+} centres in MgO *R S De Biasi* C4885

Electron paramagnetic resonance spectra of Fe^{3+} ions in C_{1h} sites in strontium oxide *A F M Y Haider* C5667

76.30K Rare-earth ions and impurities

EPR investigations of the superhyperfine interaction and of the zero-field splittings for cubic and tetragonal Gd^{3+} centres at sixfold coordinated sites in AMF$_3$ crystals *J Y Buzaré, M Fayet-Bonnel and J C Fayet* C67

76.30M Colour centres and other defects

^{13}C hyperfine structure and relaxation times of the P1 centre in diamond *R C Barklie and J Guven* C3621

76.40 Diamagnetic and cyclotron resonances

Breakdown of screening in Voigt cyclotron resonance *S W McKnight and H D Drew* C5367

76.60 Nuclear magnetic resonance and relaxation

Variation of the sublattice magnetisation in antiferromagnetic GdVO$_4$ with temperature from the NMR of ^{51}V, $I = 7/2$ *B Bleaney, A C de Oliveira and M R Wells* CL505

NMR study of diffusion in Li$_3$N *R Messer, H Birli and K Differt* C2731

NMR study of molecular motion in solid trimethyloxosulphonium halides *S Jurga, K Jurga and Z Pająk* C4433

NMR study of molecular motions and disorder in K$_3$ZrF$_7$ and K$_2$TaF$_7$ *E C Reynhardt, J C Pratt, A Watton and H E Petch* C4701

76.60E Relaxation effects

Nuclear spin relaxation by translational diffusion in liquids and solids: high- and low-frequency limits *C A Sholl* C447

Nuclear spin–lattice relaxation in incommensurate systems *S Žumer and R Blinc* C465

Nuclear spin relaxation by translation diffusion in solids: VI. Monovacancy limit *C A Sholl* C1479

Strong collision approach of nuclear Zeeman relaxation time T_1 of a tetrahedrally coordinated four-spin-$\frac{1}{2}$ system *K Morimoto* C2493

Comment on nuclear spin relaxation by translational diffusion in liquids: effects of the eccentricity of the nuclei *E Belorizky and P H Fries* CL521

Spin–lattice relaxation by diffusion in amorphous Si:H *B Movaghar and L Schweitzer* C5185

Multipulse NMR investigation of band structure in titanium hydride: proton Knight shift and spin–lattice relaxation *R Göring, R Lukas and K Bohmhammel* C5675

76.60G Quadrupole resonance

Nuclear quadrupole interaction of ^{111}Cd and inter-configuration fluctuation in $EuCu_2Si_2$ *S H Devare, H G Devare and J A Cameron* C1491

76.60L Spin echoes

Molecular motion and deuterium NMR spin echoes in solids *T B Smith, E A Moore and M Mortimer* C3965

76.70 Magnetic double resonances and cross effects

76.70D Electron–nuclear double resonance

ENDOR determination of covalency in K_2NaAlF_6:Fe^{3+},Cr^{3+} *C D Adam* CL105

76.70H Optical double magnetic resonance

Optically detected magnetic resonance of P_4 cluster centres in phosphorus-doped zinc selenide *D Verity, J J Davies and J E Nicholls* C485

The optically detected magnetic resonance of pure and doped silver bromide *A Marchetti* C961

Optically detected nuclear magnetic resonance studies of $LiYF_4$:Pr^{3+} in the ground electronic state $^3H_4$ *K K Sharma and L E Erikson* C1329

Optically detected magnetic resonance of two shallow acceptor centres in cadmium sulphide *J L Patel, J E Nicholls and J J Davies* C1339

ODMR in the photo-excited $^3B_{1u}$ state of F_2^{2+} centres in MgO:II. Magnetic field effects and optical selection rules *B Henderson, M Yamaga, M Glasbeek and R Sitters* C2505

Photo-EPR and ODMR investigations of radioactive processes in ZnS:Cr,Sc *M Godlweski, Z Wilamowski, M Kamińska, W E Lamb and B C Cavenett* C2835

ODMR observation of a quenching centre for the copper-green and other visible emission bands in zinc sulphide *J L Patel, J J Davies, J E Nicholls and B Lunn* C4717

Direct optically detected magnetic resonance observation of a copper centre associated with the green emission in ZnSe *J L Patel, J J Davies and J E Nicholls* C5545

76.80 Mössbauer effect; other γ-ray spectroscopy

$KFeF_3$ single crystal studied by polarised Mössbauer ray *D Barb, D Tarină, A Ito and S Morimoto* C497

A study of the magnetic exchange interactions in $SrEu_2Fe_2O_7$ by ^{151}Eu Mössbauer spectroscopy *T C Gibb* C1985

Study of defects in Te-doped GaAs by Mössbauer spectroscopy *D L Williamson and P Gibart* C2517

Effect of valence instability on the magnetic hyperfine interaction in $EuPt_3$ at very high pressure *M M Abd-Elmeguid and H Micklitz* CL797

Mössbauer effect studies of ternary alloy systems $Fe(Sb_{1-x}Te_x)_2$ for $0 \leq x \leq 1$ *Y K Sharma, B K Srivastava and S Lokanathan* CL859

77.00 DIELECTRIC PROPERTIES AND MATERIALS

77.30 Polarisation and depolarisation effects

Thermally stimulated polarisation and depolarisation currents (TSPC and TSDC) in LiF:Mg^{2+} (TLD-100) *S W S McKeever and E Lilley* C3547

Polarisation of CdF_2 by blocking electrodes: I. Surface polarisation *A Kessler* C4357

77.40 Dielectric loss and relaxation

Clustering in rare-earth-doped alkaline earth fluorides *C G Andeen, J J Fontanella, M C Wintersgill, P J Welcher, R J Kimble Jr and G E Matthews* C3557

77.60 Piezoelectricity and electrostriction

Piezoelectric scattering in quantised surface layers in semiconductors *P K Basu and B R Nag* C1519

Non-linear excitations in a compressible chain of dipoles *M Remoissenet* CL335

77.80 Ferroelectricity and antiferroelectricity

Frequency splitting and saturation of the field-induced Raman spectrum of the ferroelectric soft mode in $SrTiO_3$ *T Shigenari and H Ebashi* C969

Structural studies of deuterated CsH_2AsO_4 in its paraelectric and ferroelectric phases *W J Hay and R J Nelmes* C1043

Incidence of ferroelectric phase transitions on the electronic structure of potassium niobate *F M Michel-Calendini and H Chermette* C1179

High resolution studies of cubic perovskites by elastic neutron diffraction II: $SrTiO_3$, $KMnF_3$, $RbCaF_3$ and $CsPbCl_3$ *J Hutton and R J Nelmes* C1713

The influence of an electric field and hydrostatic pressure on dielectric properties and phase transitions in $PbZrO_3$ *J Hańderek, M Pisarski and Z Ujma* C2007

Determination of Landau free-energy parameters by dielectric measurements in the ferroelectric TSCC *J Bornarel and V H Schmidt* C2017

Calorimetric study of the ferroelectric $(N(CH_3)_4)_2ZnCl_4$: critical behaviour of the commensurate–incommensurate phase transition *I Ruiz Larrea, A López-Echarri and M J Tello* C3171

Neutron study of the incommensurate phase in $(N(CD_3)_4)_2ZnCl_4$ crystal *G Marion, R Almairac, J Lefebvre and M Ribet* C3177

Surface layer in ferroelectric $KTa_{1-x}Nb_xO_3$ *J P Ansermet, D Rytz, A Châtelain, U T Höchli and H E Weibel* C4541

Analysis of proton tunnelling in KDP using a realistic proton potential *G N Robertson and M C Lawrence* C4559

Scattering properties of ferroelectric domain walls *D A Bruce* C5195

78.00 OPTICAL PROPERTIES AND CONDENSED MATTER SPECTROSCOPY AND OTHER INTERACTIONS OF MATTER WITH PARTICLES AND RADIATION

78.20 Optical properties and materials

The coherent non-linear light propagation in crystal in the exciton range of the spectrum *S N Belkin, P I Khadzhi, S A Moskalenko and A H Rotaru* C4109

78.20F Birefringence

Birefringence measurements on $KTaO_3$:Li *E Courtens* CL37

Measurement of the critical exponent β by means of optical birefringence on the Heisenberg antiferromagnet $RbMnF_3$ *A Sa Stefanescu and P-J Becker* CL737

Linear magnetic birefringence and double-excitonic transitions of the two-dimensional antiferromagnet $BaNiF_4$ *W Kleemann, F J Schäfer and J Nouet* C4447

Magneto-optical properties of the two-dimensional ferromagnet K_2CuF_4: II. Linear magnetic birefringence *W Kleemann, J Ferré and F J Schäfer* C4463

78.20L Magneto-optical effects

Magneto-optical properties of Sm^{2+} ion in CaF_2 *T Tsuboi* C4727

Temperature study of interband magnetoabsorption in $Hg_{1-x}Mn_xTe$ mixed crystals *M Dobrowolska and W Dobrowolski* C5689

78.30 Infrared and Raman spectra and scattering

Phonon replicas in mixed crystals *D Schmeltzer and R Beserman* C273

Infrared and Raman spectra of ReO_4^- isolated in alkali halides *M R Mohammad and W F Sherman* C283

Properties of polycrystalline silicon prepared by chemical transport in hydrogen plasma at temperatures between 80 and 400°C *S Veprek, Z Iqbal, H R Oswald and A P Webb* C295

Determination of the hydrogen content of a-Si films by infrared spectroscopy and 25 MeV α-particle elastic scattering *P John, I M Odeh, M J K Thomas, M J Tricker, J I B Wilson, J B A England and D Newton* C309

Far-infrared absorption of silver β-alumina *W Hayes, L Holden and B C Tofield* C511

Excitations in commensurate and incommensurate $BaMnF_4$: a light scattering study *D J Lockwood, A F Murray and N L Rowell* C753

A Raman study of the phase transition in hexa-ammine nickel (II) chloride *T E Jenkins and A R Bates* C817

Raman scattering from magnons and phonons in the mixed antiferromagnet $Fe_{1-x}Mn_xCl_2$ *G Mischler, D Bertrand, D J Lockwood, M G Cottam and S Legrand* C945

Frequency splitting and saturation of the field-induced Raman spectrum of the ferroelectric soft mode in $SrTiO_3$ *T Shigenari and H Ebashi* C969

The Raman spectrum and analysis of phonon modes in sodalite *J Ariai and S R P Smith* C1193

Raman spectrum and cation chain dynamics in a layered crystal: $(NH_3\text{–}CH_2\text{–}CH_2\text{–}NH_3)CdCl_4$ *Z Iqbal, H Arend and P Wachter* C1497

Radiation-induced interstitial boron defects in gallium phosphide and gallium arsenide *J Woodhead and R C Newman* CL345

Raman spectra of $ZrS_{2.5}Se_{0.5}$ *S Jandl and R Provencher* CL461

Phonon Raman spectroscopy in systems with electronic degeneracy *C D Churcher and G E Stedman* C2237

Observation of coupled amplitude modes in the Raman spectrum of incommensurate Na_2CO_3 *A Maciel and J F Ryan* CL509

Raman spectra of NaCl:Pb crystals *J E Oliveira, J Mendes-Filho and J E Moreira* C2527

Far infrared optical properties of single crystal $CdGa_2Te_4$ *P M Nikolić and S M Stojilković* CL551

Analysis of Raman lineshapes and local order in squaric acid *E Fjaer, J Grip and E J Samuelsen* C3057

Raman scattering induced by V-centre aggregates in pure and Ca-doped KI x-irradiated at room temperature *E Rzepka, S Lefrant, L Taurel and A E Hughes* CL767

Infrared and Raman spectra of ReO_4^- isolated in alkali halides in CsCl structure *M R Mohammed and W F Sherman* C4121

Vibrational study of hydrogen beta alumina *Ph Colomban, G Lucazeau and A Novak* C4325

Raman scattering study of spin dynamics in the quasi-1D Ising antiferromagnets $CsCoCl_3$ and $CsCoBr_3$ *W P Lehmann, W Breitling and R Weber* C4655

Infrared absorption of Al–Li defect pairs in ZnSe and CdTe *J S Ko and W G Spitzer* C4891

Vibrational properties of the F centre absorption in alkali halides *F Dochy* C4907

Optical study of Eu^{3+} centres in CdF_2 *J P Jouart, C Bissieux, M Egee, G Mary and M de Murcia* C4923

Raman study of orientational dynamics of sulphate ions in potash alum *A K Sood, A K Arora, S Dattagupta and G Venkataraman* C5215

Infrared studies of phonons and free carriers in $CaAs_3$, $SrAs_3$, $BaAs_3$ and α-EuP_3 *B Oleś and H G von Schnering* C5559

Irreducible analysis of Raman spectra for all crystal point groups *C D Churcher and G E Stedman* C5707

78.35 Brillouin and Rayleigh scattering

Theory of one-magnon light scattering in three-sublattice ferrimagnets *A F Khater and R B Guimarães* C2665

Light scattering in displacive incommensurate structures: a Landau theory approach *H Poulet and R M Pick* C2675

Theory of transmission coefficients and resonance Brillouin scattering for three-branch exciton–polaritons *G Palamidas and D R Tilley* C2951

Resonant Brillouin scattering in cuprous oxide: theory *V C Y So, J E Sipe, M Fukui and G I Stegeman* C4487

Resonant Brillouin scattering in cuprous oxide: experiment *V C Y So, M Fukui, P J Thomas and G I Stegeman* C4505

Enhanced Brillouin scattering involving surface plasmon polaritons *M Fukui, O Tada, V C Y So and G I Stegeman* C5591

78.40 Visible and ultraviolet spectra

Fundamental reflectivity spectra of CdMnTe mixed crystals *T Kendelewicz* CL407

Polarisation dependent reflectivity of $ZrSe_3$ and $ZrTe_3$ *S C Bayliss and W Y Liang* CL803

Vibrational fine structure in the optical spectra of $NiXF_6\,6R_2O$ ($X = Si, Ti$; $R = H, D$) at low temperatures *S K Datta and D De* CL1019

78.50 Impurity and defect absorption in solids

Uniaxial stress measurement on the 0.97 eV line in irradiated silicon *C P Foy, M C do Carmo, G Davies and E C Lightowlers* CL7

Optical transitions to the first vibronic state of GR1 in diamond *J E Lowther* CL375

Stress-induced dichroism and Jahn–Teller active modes at the neutral vacancy in diamond *G Davies* CL391

Effects of pressure on the spectra and lifetimes of $Nd_xY_{1-x}P_5O_{14}$ and ruby *L D Merkle, I L Spain and R C Powell* C2027

Investigation of resonant energy transfer for LaF_3:Pr^{3+} *E Strauss, W J Miniscalco, J Hegarty and W M Yen* C2229

The optical properties of copper in zinc oxide *P J Dean, D J Robbins, S G Bishop, J A Savage and P Porteous* C2847

The origin of the α, β, γ blue no-phonon transitions in ZnO:Cu—A deep-level problem *D J Robbins, D C Herbert and P J Dean* C2859

Isotope effects on the 969 meV vibronic band in silicon *G Davies and M C do Carmo* CL687

Jahn–Teller effect of the B absorption band of Tl^+-type ions in a cubic field *S Asano and Y Nakao* C3897

Energy levels of silicon doped with iron *H R Szawelska and H Feichtinger* C4131

Optical properties of nickel (d^9) in GaP and ZnSe *H R Szawelska, J M Noras and J W Allen* C4141

The TR12 vibronic band in diamond *G Davies, C Foy and K O'Donnell* C4153

Infrared absorption of Al–Li defect pairs in ZnSe and CdTe *J S Ko and W G Spitzer* C4891

Vibrational properties of the F centre absorption in alkali halides *F Dochy* C4907

Optical study of Eu^{3+} centres in CdF_2 *J P Jouart, C Bissieux, M Egee, G Mary and M de Murcia* C4923

Optical and capacitance spectroscopy of InP:Fe *P R Tapster, M S Skolnick, R G Humphreys, P J Dean, B Cockayne and W R MacEwan* C5069

Dimers and clusters in CaF_2:Pr^{3+}. Laser selective excitation and time-resolved spectroscopy *R H Petit, P Evesque and J Duran* C5081

New metastable absorption bands in KBr *G Giuliani, S Malusa and V Mitra* CL1073

78.55 Photoluminescence

High-resolution luminescence-excitation spectra of the GR defect in diamond *A T Collins* C289

Photoluminescence studies of band-bending in hydrogenated amorphous silicon thin films *D J Dunstan* C1363

Bound exciton recombination in beryllium-doped silicon *M O Henry, E C Lightowlers, N Killoran, D J Dunstan and B C Cavenett* CL255

Electron capture luminescence in GaP:O revisited *M Gal, B C Cavenett and P J Dean* C1507

Calculations of spectral transfer in disordered and low-dimensional systems *M C K Wiltshire* CL339

The no-phonon luminescence at 0.84eV in GaAs:Cr—the Zeeman splitting *F Voillot, J Barrau, M Brousseau and J C Brabant* C1855

Acceptor bound exciton absorption and luminescence in germanium *E C Lightowlers and Z E Ciechanowska* CL719

The no-phonon luminescence at 0.84eV in GaAs: Cr—splitting under uniaxial stress *J Barrau, F Voillot, M Brousseau, J C Brabant and G Poiblaud* C3447

Photoluminescence properties of Cu-doped GaSe *V Capozzi and A Minafra* C4335

The no-phonon luminescence at 0.84eV in GaAs:Cr. The ground set of states *F Voillot, J Barrau, M Brousseau and J C Brabant* C5725

78.60 Luminescence spectra and radiative recombination

78.60F Electroluminescence

Free exciton emission in forward biased ZnSe MIS diodes *X W Fan and J Woods* C1863

The lifetimes of excited states and spectral intensities of DCEL in ZnS:Cu:Nd:Cl thin films *G Z Zhong and F J Bryant* C2175

78.60H Cathodoluminescence, ionoluminescence

Donor–acceptor transition in CuGaSe$_2$ *A Poure, J P Leyris and J P Aicardi* C521

78.60K Thermoluminescence

Thermoluminescence of Z_1 centre in Sr-doped KCl *V S Kamavisdar and B T Deshmukh* C83

A new procedure for analysing complex thermoluminescence *M A S Sweet and D Urquhart* C773

Thermoluminescence and colour centre stability in KCl:Ba irradiated at room temperature *A Rascón and J L Alvarez Rivas* CL741

Thermoluminescence in LiF (TLD-100) and LiF crystals irradiated at room temperature *F Sagastibelza and J L Alvarez Rivas* C1873

78.65 Optical properties of thin films

High-temperature optical modes of vibration in LiF thin films *K Hisano* C3079

Effect of annealing on the optical gap of a-Si:H *A Deneuville, A Mini and J C Bruyère* C4531

Optical modes of vibration in non-stoichiometric LiF thin film *K Hisano* CL973

78.70 Other interactions of matter with particles and radiation

78.70C X-ray scattering

Anomalous scattering of x-rays by total reflection in the L-edge regions of iron and copper *L Kaihola and J Bremer* CL43

X-ray Compton profile of lithium in low momentum transfer region *T Suzuki and H Nagasawa* C783

78.70D X-ray absorption and absorption edges

L_{III} x-ray absorption discontinuity of Nd, Sm, Gd, Dy and Yb in their sesquioxides *Pranawa Deshmukh, Prabodhachandra Deshmukh and Chintamani Mande* C531

The extended x-ray absorption fine structure in the reflectivity at the K edge of Cu *G Martens and P Rabe* C1523

Conduction band symmetry in Ta chalcogenides from Ta L-edge x-ray absorption spectroscopy (XAS) *J V Acrivos, S S P Parkin, J Code, J Reynolds, K Hathaway, H Kurasaki and E A Marseglia* CL349

XPS and x-ray absorption edge studies of the surface and bulk valence states of cerium in CeCo$_2$ *C N R Rao, D D Sarma, P R Sarode, R Vijayaraghavan, S K Dhar and S K Malik* CL451

Mott g-ratios in Rb$_x$(NH$_3$)$_{1-x}$ and oxidation state of rubidium compounds from XAS *J V Acrivos, K Hathaway, A Robertson, A Thompson and M P Klein* CL557

X-ray absorption near edge structures of intermediate valence TmSe single crystals *A Bianconi, S Modesti, M Campagna, K Fischer and S Stizza* C4737

78.70E X-ray emission threshold and fluorescence

Origin of low-energy satellites in K x-ray spectra: II, β-region *A N Nigam and S N Soni* C3289

Valence states of titanium atoms in non-stoichiometric carbides: x-ray emission spectra and cluster calculations *V A Gubanov, E Z Kurmaev and D E Ellis* C5567

78.90 Other topics in optical properties of condensed matter and other interactions of matter with particles and radiation

Photons at non-zero chemical potential *P T Landsberg* CL1025

79.00 ELECTRON AND ION EMISSION BY LIQUIDS AND SOLIDS; IMPACT PHENOMENA

79.20 Impact phenomena

- The Auger and autoionisation spectra of clean and oxidised samarium and erbium *F P Netzer, E Bertel and J A D Matthew* C1891
- Sodium ion migration in glass on electron beam irradiation *D M Usher* C2039
- Electron energy loss spectroscopy. Calculation of the impact scattering from W(100)p(1 × 1)H *G C Aers, T B Grimley, J B Pendry and K L Sebastian* C3995
- Correlation effects on Auger spectra in unfilled d band metals *G Tréglia, M C Desjonquères, F Ducastelle and D Spanjaard* C4347
- The influence of the number of unoccupied 3d states on the $L_3M_{4,5}M_{4,5}$ Auger spectrum of Ni *P T Andrews, T Collins and P Weightman* CL957
- Many-electron interactions in M_{45}–NN Auger spectrum of metallic cadmium *M Ohno and J M Mariot* CL1133

79.60 Photoemission and photoelectron spectra

- Angle-resolved photoemission from As-stable GaAs(001) surfaces prepared by MBE *P K Larsen, J H Neave and B A Joyce* C167
- Evidence for the presence of mixed valency in CeNi$_2$; XPS study *B D Padalia, V Prabhawalkar, P D Prabhawalkar, E V Sampathkumaran, L C Gupta and R Vijayaraghavan* CL93
- Atomic effects in the photoemission cross sections of the valence states of MoS$_2$ *I T McGovern, K D Childs, H M Clearfield and R H Williams* CL243
- Theory of inverse photoemission *J B Pendry* C1381
- A theoretical study of angle-resolved photoemission from adsorbates: bromine on (100) face of copper *N Kar* C2185
- Comments about the existence of an intermediate valence state in CeNi$_2$ deduced from XPS experiments *G Krill and J P Kappler* CL515
- Reply to the comments of Krill and Kappler in relation to our XPS work on CeNi$_2$ *B D Padalia, V Prabhawalkar, P D Prabhawalkar, E V Sampathkumaran, L C Gupta and R Vijayaraghavan* CL519
- On the temperature dependence in photoemission from metal surfaces *C G Larsson and J B Pendry* C3089
- Surface states on W {001} (1 × 1) and $(\sqrt{2} \times \sqrt{2})R45°$ phases: angle-resolved photoemission *J C Campuzano, J E Inglesfield, D A King and C Somerton* C3099
- Frequency-dependent photoemission from aluminium *N Barberan and J E Inglesfield* C3115
- Multiplet structure of 2p and 3p photoelectron spectra from low-spin and high-spin cobalt (III) compounds *I G Main, G A Robins and G Demazeau* C3633
- Photoemission and magnetic effects in NaCrS$_2$ *H P Hughes, A W Parke, R H Williams and J J Barry* CL1103

79.70 Field emission and field ionisation

- Field emission from tungsten (110) *A Modinos and G Oxinos* C1373
